

UTAH POWER & LIGHT COMPANY

1407 WEST NORTH TEMPLE STREET

P. O. BOX 899

SALT LAKE CITY, UTAH 84110

February 6, 1975

INFORMATION PAGE

Mr. Dave Rowley, Commissioner
Price River Distribution System
Route 1 - Box 73
Helper, Utah 84526

Dear Mr. Rowley:

In a recent meeting of the Price River Water Users, a Utah Power & Light Company representative indicated the need for a water supply for our coal loading facilities near Wellington. This water supply would be used for settling coal dust and other incidental uses at Utah Power & Light Company's facility operated by Mine Services Co.

It is requested that delivery be made during the irrigation season of approximately 0.5 CFS flow through the Carbon Canal for use at our coal loading facilities. Delivery of this water should be administered against Utah Power & Light Company's water rights in the Price River and delivery should continue until further notice.

Contact regarding matters relating to this water delivery should be made through Mr. Jay Haight in our Salt Lake office.

Yours very truly,

James S. Hooper
JAMES S. HOOPER
Superintendent of Power
