WATER RIGHTS
SALT LAKE

INTEROFFICE MEMORANDUM

DATE: March 22, 1994

TO: Lee Sim, Assistant State Engineer for Distribution
John Larsen, Water Rights Specialist

FROM: Mark Page, Price Office Regional Engineer *Mark*

RE: Price River Distribution System
Account 21A - KFJ Ranch - 70.72%
Account 21B - Tain Clark - 16.61%
Account 21C - Mont Blackburn - 12.67%

There was a question at the 1994 annual Price River Distribution Meeting concerning the Farnham Ditch, which is where Account 21 is diverted from the Price River. In meeting with Kerwin Jensen and Smoke Clark on March 22, 1994, the decision was made to attempt to calibrate their ditch by using the lower collection box, and this calibration work will be accomplished by the Price Regional Office staff.

It was also decided that because the commissioner provides very little service at this diversion point, Account 21 will be assessed at one-half the assessment rate, beginning with the 1994 assessment.

Commissioner Davis will continue to visit this diversion on a weekly basis, however the water users have agreed to keep a daily record of their water use which will then be made available to Commissioner Davis for information contained in his annual report.
