Utah State Engineer  
State Capitol  
Salt Lake City, Utah

Dear Sir:

RE: PRICE RIVER DISTRIBUTION  
RE: APPLICATION NO. 11703

At the hearing at your office on October 26th between Horseshoe Irrigation Company and the Cottonwood Creek Consolidated Irrigation Company a suggestion was made that a river commissioner be appointed to divide the waters that go into transmountain division into Sanpete. This offer requested that the water users on the Carbon and Emery side be contacted to see if they were interested in having a River Commissioner appointed and share in the expenses incurred.

I am also attorney for the Price River Water Conservation District. I took this matter up with them at their regular board meeting last evening, November 5th. The board past a resolution against having a river commissioner appointed in which they would be called upon to pay part of the expenses. They felt that they have no conflict in the division of water at the present time that a river commissioner would help solve.

Very truly yours,

*Duane A. Frandsen*
