Mr. Richard B. Gappmayer, Secretary  
Utah Lake Distributing Company  
1156 South State Street, #202  
Orem, UT 84058

Dear Mr. Gappmayer:

Attached is Central Utah Water Conservancy District's completed "Utah Lake Distributing Company Report of Irrigation Water Use for 1995" returned to you as requested. The District has indicated on the questionnaire that the 48 shares of stock it owns in the company will be used for future municipal use. Upon canal company approval, the District will utilize the water represented by the shares of stock it owns by exchange to replace to Utah Lake a portion of the water it withholds from Utah Lake by storing water in Jordanelle Reservoir. This will require State Engineer approval of appropriate water right applications. The water represented by the 48 shares of stock owned by the District will be essential in the future to facilitate this exchange of water for municipal purposes. It is very important to the District that use of the stock it owns be identified as "future municipal." and not "non-use."

The District will be requesting to meet with the Utah Lake Distributing Company officials in the near future to discuss this concept. We understand that canal company approval is needed in order for the District to proceed with the filing of appropriate water rights with the State Engineer's Office.

If you have any questions, please contact Richard Tullis at this office. Again, the District believes that it is very important to document that its plans are to work with the Utah Lake Distributing Company and other canal companies to protect the water represented by stock the District owns.

Sincerely yours,

Don A. Christiansen  
General Manager
