

## EXPLANATORY.

NOTE.—Never use 3a except when it is intended to store the water to be appropriated; in such cases the volume of water to be stored should be given in acre feet in that space. The time during which it is to be released and used should be set forth in 4, and the time during which it is to be stored stated in 4a. The lands to be inundated by the reservoir must be described in the space below this note as nearly as may be, and by Government subdivisions if upon surveyed land. The area of reservoir when at full stage should be given in acres in the same space. If the water is released from the reservoir into the natural channel of the stream, the point where it is diverted from such stream should be described in 7, and the center of the impounding dam described in the space below this note in accordance with the note given in 7. The data given in 8 to 17, inclusive, should be relative to the works used to divert the water from the natural channel. All other works should be described in the space below this note, except where the water is not stored in the natural channel of the stream supplying it; in such case, the point of diversion is the place where the water is taken from the supplying source and should be described in 7; and 8 to 17, inclusive, should be used to describe the diverting works. It is permissible to appropriate water from more than one source, provided the water from the sources specified is taken to one place and is used for one purpose. In case the application is made for the water from a number of springs, the point where the water is collected should be described as the point of diversion and the works below it described as the diverting works; those above it as the collecting works. Each spring should also be described in accordance with note in 7. In case two or more streams are specified as the direct sources of supply, the point where the water is diverted from each stream must be described in accordance with note in 7. The quantity of water diverted from each such stream should also be specified in the space below this note, if only approximately.

*The following additional facts are set forth in order to more clearly define the full purpose of the*

*proposed appropriation: The water sought to be appropriated by this application is water which is troed in what is known as the Big Elk Lake Reservoir No. 1, which reservoir site was obtained from the Department of the Interior, of the United States, on or about the day of March 1, 1907, and under Sections 18 to 21 inclusive, of the Act of Congress, approved March 3rd 1891, entitled "An Act to regulate Timber Culture Lands and other purpose." Said water will be stored in said reservoir during the period set forth in 4-a herein and will be released from said reservoir during the period set forth in 4-a herein and will be released from said reservoir during the period set forth in No. 4 herein.*

*The initial point of Reservoir No. 1 is located at the east end of the dam and is a large stone set firmly in the ground with the working point thus, "X" marked on top of stone, 15½ feet north of a large pine tree blazed and marked D&BT, and the area of said reservoir is 46.77 acres.*

*Said reservoir is located at the head of Boulder fork of the north branch of the Provo River in Summit County, State of Utah. The land upon which said reservoir is located is unsurveyed, but said reservoir is approximately 20 to 30 miles northerly from the point of diversion, where said water is to be taken from the main stream of the Provo, as set forth in No. 7 herein.*

*The water which will supply said reservoir comes from the snows which fall within the area covered by the reservoir and from springs which arise within the area of said reservoir. The water to be stored in said reservoir will be the flood waters that come from the melted snows and the springs located within the area of said reservoir.*

*Reservoir No. 1 is located in what is commonly called a box canyon and the work required to complete the reservoir will consist of a dam placed across the lower portion of the reservoir which dam will be constructed of rock, earth and cement, namely 25 sec. feet.*

*The direct flow of water applied for will be available between June 1st and September 15th of each year.*

*The center of the impounding dam bears N. 23°00' E. 38,760 feet from the N.E. corner of Sec. 11, T. 3 S., R. 7 E., S.L.B.M.*

*The water to be stored in this reservoir is intended to be a supplemental supply and in no case will the water used exceed one second foot to each 70 acres of land to be irrigated.*

President.

## Application to Appropriate Water.

**Dates** 1:00 P.M. **State Engineer's Endorsements.**

Nov. 12, 1909 Application received at State Engineer's office.

Dec. 11, 1909 Application examined and filed

Dec. 11, 1909 Application returned to James Prescott for correction

Reason for returning application. 7 must be filled in accordance with note in it. Canal is part of diverting works and should be named as such in 8. Remainder of data relative to reservoir site near top of opposite page should be furnished. Time of use of 25 second feet of water should be given on opposite page. Total area must equal the area of subdivisions given.

Feb. 4, 1910 Corrected application returned to State Engineer's office

Feb. 4, 1910 Corrected application examined and filed

Application rejected and returned to applicant

Reason for rejecting application

Apr. 28, 1911 Application approved and returned to applicant by mail

This application is approved on condition and it is hereby required that actual construction work shall begin within six months and be fully completed by April 1, 1913 and the water applied to the beneficial use specified by Dec. 31, 1914.

Caleb Tanner  
State Engineer.

APPLICATION

OF  
Washington Irrigation Co.,

TO  
APPROPRIATE WATER  
FROM

Boulder Creek

FOR  
IRRIGATION PURPOSES.

Recorded in book I.B. of Applications  
510  
to Appropriate Water, on pages  
512  
to

Rules and Regulations.

All applications must be dated at place where made and signed by applicant.  
Erasures must not be made on applications, but any matter may be eliminated from them by running a red line through it.  
All corrections on applications returned for that purpose must be made in red ink and be plainly written.  
Applications returned to applicants for correction must be resubmitted to this office within sixty days or the priority determined by the original receiving date will be lost.  
Applications resubmitted after the expiration of sixty days will be treated as new applications in all respects.  
See section 1288x7, Compiled Laws of Utah, 1907, or Section 1288x7, Chapter 62, Session Laws of Utah, 1909.  
No application or other paper pertaining to an application will be marked "received" until the required fees have been paid.  
Applicants will be informed by this office when the cost of publishing notice of application is due.  
Applicants must advance cost of publication within ten days after having been so informed.  
Request for extension of time for completion of construction or for application to a beneficial use will not be considered unless accompanied by sufficient affidavit and required fee.  
Do not "back" the application or make any endorsements on page 3.

Fees Required by Law for State Treasury.

For examining and filing applications to appropriate 10 cubic feet per second of water or less . . . . .	\$2.50
For examining and filing applications to appropriate one hundred twenty-five acre feet of water or less	2.50
For examining and filing applications to appropriate more than 10 cubic feet per second of water a fee of \$2.50 plus \$1.00 for each cubic foot per second in excess of that flow.	
For examining and filing applications to appropriate more than one hundred twenty-five acre feet of water a fee of 2 cts. for each acre foot.	
Provided, however, that when a filing fee of any application to appropriate water shall exceed \$1,000.00 the balance of the fee in excess of \$1,000.00 may, at the option of the applicant, be paid at the time the proof of completion of the works is submitted.	
For approving and recording completed applications . . . . .	2.50
For examining and filing written proofs of completion of works . . . . .	1.00
For examining and filing written proofs of beneficial use of water . . . . .	1.00
For examining and filing map, profile, and drawings that are part of the proof of completion of works	5.00
For examining and filing map, profile, and drawings that are part of the proof of beneficial use of water	5.00
For issuing a certificate of appropriation . . . . .	1.00
For filing an affidavit or any other paper . . . . .	1.00

NOTE.—Applicants will save time and expense by familiarizing themselves with the law before making applications.
