

FOREWORD

Pursuant to the call of the State Engineer, duly published, the annual Water Users meeting was held in the Court Room, at Provo City, Utah, January 23, 1952. A majority of the water users of the Provo River System were represented at the meeting.

The financial report of the State Engineer was read and accepted.

A motion was made, seconded and passed unanimously that T F Wentz be retained as Provo River Commissioner and I F Baum, Deputy Commissioner.

The meeting selected an Executive Committee of seven for the 1952 season; Neils Anderson, Earl Conder and Tracy Colvin of Utah County; Elmer Seal of Salt Lake County; A P Hicken and E F B onner of Wasatch County; and J W Prescott of Summit County. This committee elected A P Hicken as chairman and Earl Conder secretary, made the 1952 budget and fixed salaries for the year.

Deer Creek Reservoir filled to spill for the seventh successive year. All of the reservoirs at the head of Provo River filled.

The Class A Rights were 100% through the season. The first Class Rights were 100% to August 1, and averaged 99% balance of season.

Highwater impaired Fort Field Dam, Dry Creek Dam, and Tanner Race Dam. New Dams are being built for Fort Field, Dry Creek and Tanner Race combined at Tanner Race Damsite, Utah Power & Light Company extended their flow line about 800 feet to near Hanging Rock, above Snowslide Hollow, and installed a flashboard Dam. Duchesne Tunnel was completed.

During the season there was no measuring device on flow line of Olmsted Plant. For distribution we were obliged to use discharges at USGS Stations at Vivian Park, old ratings of turbines and quantities required to supply decreed rights below plant.
