

Hanksville Wayne Co, Utah

July 26/1927

State Engineer, Geo M. Bacon  
Salt Lake City Ut.

Dear sir. I dont know just what  
our lawyer Mr Erickson of Richfield  
has wrote you about the measuring  
device that should be at Vern Pace's  
point of diversion on Boul Creek.  
As its slow communicating in thro  
part so I that it would be no  
harm for me to write you and  
inform you that there is no measuring  
device at all at Pace's point of diversion  
and we would like very much for  
you to send a man Mr McBride, or  
Mr Tanner of Fremont down here to  
put or help put ~~the~~ a cement device  
with a lock on it, in, we think if  
such a device was put in by men  
having authority from the State  
that no one would hardly dare to  
molest it. We want the measuring device put in

and the water measured by a reliable man.  
Of course if Mr Erickson has laid this matter  
before you. kindly lay this aside

would you communicate with Mr Ferdinand  
Erickson and see what he has done in  
regards to sending a man down? he wrote  
me that McBride that there was a  
measuring device in and hesitated about  
coming

and greatly oblige  
Respectfully

Columbus R. Hall  
and Roxanna D. Hall
