Richfield, 7/4/27.

Mr. Clair M. Senior,

Dear Sir:

Have just returned from my ranch, while there, I turned most of the water down toward Mr. Hall to make observation as to how much water it would take to reach his point of diversion.

Mr. F. J. Weber was asked to go and do the work both by Mr. Hall and myself. Hall was going to accompany Weber and myself to the point of my diversion but for some reason he did not appear.

I consider Mr. Weber the most proficient and fair man we could have chosen. You will find on file in the State engineer's office a report of Weber's findings. I haven't read it but feel it will be unbiased and fair to all parties interested.

I may be in Salt Lake this month and will call and see what can be done. I am

Yours truly,

V. W. Pace.
