Gentlemen: RE: COAL CREEK DISTRIBUTION

Your attention is called to my letters of April 12 and October 4 of the present year, relative to installing a joint control head gate in the head of your canal, that might be set and locked; also a Parshall measuring flume downstream therefrom in the canal to measure the water jointly from the stream.

You were required in these letters to submit to this office, plans and specifications for these structures. No such plans have been received at the time of the present writing. You are urged to submit these plans at once, as you will be required to make the installation before water is diverted in the spring of 1950.

Yours very truly,

H. A. Linke

Harold A. Linke
STATE ENGINEER

FWC/vm

*you will receive plans soon of what we already put in this spring even before we got your first letter. abner perry took charge of same just a while before he died and that was about April 5-49. Both letters have been presented before Board meetings, and plans are under way, you will receive them soon.
