

191 West First South St

Cedar City, Utah.

February 10 1949

Mr Ed H. Watson,  
State Engineer,  
State Capitol,  
Salt Lake City, Utah.

Dear Sir,

The North Field Reservoir & Irrigation Co by action of their Board of Directors hereby registers a protest against the division of the waters of Coal Creek during the irrigation season, especially the device used by Cedar City Corporation and South & West Field Irrigation Company which is very unsatisfactory and unfair in its division in that it is not stationery and may be changed by any one from time to time with little effort.

The NorthField Irrigation Company would appreciate it very much if the City & South And West Fields would be required to put in a permanent split that would divide the water in low season when there is a shortage of water.

Very truly yours

Secretary of North Field Reservoir  
And  
Irrigation Company
