Just when we thought it was safe to come out -- I got a call this morning from Buck Douglass requesting that we look at appointing a new commissioner. He suggested some sheriff who cruises out that way on occassion. He also mentioned the ever present infamous meters for Allred. The power operation was near operation in Oct when I visited there so I think that Red Cedar may have run out of excuses. I have even heard them say that they would have meters on when the power plants are operational.

Can we dup this off on Larsen??? He would do an excellent job.....

I guess that you prob want to talk about this. Call me at your convenience.
Later----
