

**PRICE RIVER DISTRIBUTION SYSTEM
1994 NOTES**

FEBRUARY 15, 1994 ANNUAL MEETING

1. Ditch maintenance near measuring devices is a problem throughout the system.

2. Farnham Ditch - bottom of system - no meas. device. 1993 assessment \$800 (???) claimed by water user. The commissioner does very little to regulate the water to these users. They get most of their water from return flow and sewage treatment plant returns. Primary water right but have only called on it once since Mark P. has been here. Plenty of water but the quality is not really good. There are three accounts (21 A, B, & C), how should they be assessed if at all? - on acreage? I suggested assessing them at 1/2 the rate of the other water users.
