

May 27, 1927.

Emery County Canal & Reservoir Co.,
Emery, Utah.

Gentlemen;

RE: MUDDY RIVER DIST.

Petition having been made to this office for the formation of a distribution district covering the waters of the Muddy River and the appointment of a commissioner by this office and a field investigation of conditions having been made, which indicates the necessity for such a commissioner, I hereby, in accordance with the provisions of Chapter 100, Session Laws of 1925, am consulting you with reference to recommendation, if any, which you may care to make as to the appointment of a commissioner, his compensation or other related matters.

It is not the desire of the office to interfere in any way with the proper distribution of the waters of the Muddy River and I am anxious to see that everyone interested is treated fairly. I shall appreciate your prompt reply to this letter.

Yours very truly,

State Engineer.

GMB/E

(William Petty, Sec.)
