

Initially, the boundary of the distribution system and the water rights which will be regulated by the commissioner will be limited to the rights on the main stem of Big Cottonwood Creek which are listed in the Morse Decree and which are below the mouth of the canyon and also any change applications which have been approved by the State Engineer on those rights. As the basic system becomes well established and as the need arises, the boundaries of the system may be expanded to include other rights and other areas of the Big Cottonwood Creek drainage.

JUNE 25, 1998 LETTER TO COMMITTEE

Dear Mr.

Thank you for your willingness to participate on the organizing committee for the Big Cottonwood Creek Distribution System.

The first meeting of the committee will be held on Wednesday, July 1, 1998 at 1:00 p.m. in Room 214 in the Division of Water Rights offices at 1636 West North Temple, Salt Lake City.

The efforts of the committee will be directed towards organizing the distribution system and working through the following details:

1. How the business of the system will be conducted;
2. How the commissioner will be chosen;
3. How the budget will be set up and assessments made.

For your information, I have attached a list of the committee members that have been identified so far.

I apologize that this meeting announcement is somewhat late and I hope that you will be able to arrange your schedule to attend the meeting. I have found that it is very important to have each committee member in attendance to get a good resolution of the issues. If you cannot attend please contact me at 538-7380.

I look forward to working with you to a successful organization of this system.

Sincerely,

Lee H. Sim, P.E.
Assistant State Engineer
for Adjudication and Distribution

cc: Jim Riley, Regional Engineer
