Filing No. 9569

Application to Appropriate Water for Irrigation
STATE OF UTAH

Before filling in this blank, read carefully Rules and Regulations on the back hereof, and the notes in the body of it.

Salt Lake City, Utah, Aug. 22, 1924

For the purpose of acquiring the right to use a portion of the unappropriated water of the State of Utah, for irrigation purposes, application is hereby made to the State Engineer, based upon the following showing of facts, submitted in accordance with the requirements of the Compiled Laws of Utah, 1917, as amended by the Session Laws of Utah, 1919.

Note.—The information given in the following blanks should be free from explanatory matter, but when necessary a complete supplementary statement should be made on page 2 under the heading "Explanatory."

1. The name of the applicant is State of Utah
2. The post office address of the applicant is Salt Lake City, Utah.
3. The flow of water to be used, in cubic feet per second, is
4. The quantity of water to be appropriated, in acre feet, is (see note under Explanatory) 140,000
5. The water is to be used each year from March 15 (Month) (Day) to Nov. 15 (Month) (Day)
6. The water is to be stored each year from Jan. 1st (Month) (Day), to Dec. 31 (Month) (Day)
7. The river system or drainage area to which the direct source of supply belongs is* Weber River
8. The direct source of supply is Weber River, Beaver Creek & Provo River in Summit & Wasatch Counties
9. The ~~point of issuance of spring~~ (Strike out one not needed) is situated at a point S. 17°30' W. 800 ft. from the NE cor. Sec. 35 T. 2 S., R. 5 E., S. L. M. center of dam (Deer Creek Dam Site)
S 17°30' W 800 from NE cor Sec 35 T 2 S R 5 E S L M
enlarged (Ken R)

Note.—The "point of diversion" or "point of issuance of spring" must be located definitely by course and distance or by rectangular distances with reference to some United States land corner or United States mineral monument, if within a distance of six miles of either, or if a greater distance to some prominent and permanent natural object.
No application will be received in which the "point of diversion" or "point of issuance of spring" is not described definitely. Any change made in this description after application is received and before approved will bring down the priority of application to the date when amended application is received.

10. The diverting works will consist of Dam, reservoir & canals
11. The cross-section of the diverting channel will be ⊔ \ / ○ (Strike out the ones not needed)
12. The nature of the diverting channel will be earth, wood, iron, concrete. (Strike out the ones not needed)
13. The length of the diverting channel exclusive of laterals, will be feet
14. The top width of the diverting channel will be (if a ditch) feet
15. The bottom width of the diverting channel will be (if a ditch) feet
16. The depth of water in the diverting channel will be (if a ditch) feet
17. The width of the diverting channel will be (if a flume) feet
18. The depth of water in the diverting channel will be (if a flume) feet
19. The diameter of the diverting channel will be (if a pipe) inches
20. The grade of the diverting channel will be feet per thousand
21. The legal subdivisions of the land to be irrigated are as follows: All of T. 3 S., R. 3 E., Secs. 5 to 8 Incl. 17 to 22 Incl. 27 to 36 Incl. All of T. 3 S., R. 4 E., Secs. 19 to 30 Incl. All of T. 3 S., R. 5 E., Secs. 19 to 36 Incl. All of T. 3 S., R. 6 E., Secs. 19 to 36 Incl. All of T. 3 S., R. 7 E., Secs. 19 to 36 Incl. All of T. 3 S., R.

EXPLANATORY

Note.—Never use Paragraph 4 on preceding page except when it is intended to store the water to be appropriated; in such case the volume of water to be stored should be given in acre feet in that space. The time during which the water is to be stored in the reservoir should be stated in Paragraph 5, and the time during which it is to be released and used should be set forth in Paragraph 6. The lands to be inundated by the reservoir must be described in the space below this note as nearly as may be and by government subdivisions if upon surveyed land. The area of the reservoir when at full stage should be given in acres in the same space. If the reservoir is located on a natural stream bed and the water is to be released from the reservoir into the natural channel it should be so stated in the space below, and the point where it will be rediverted from such stream should be described in Paragraph 8 and the center of the impounding dam of such reservoir should be described in the space below in accordance with note in Paragraph 8. The data given in Paragraph 18 to 20 inclusive, should be relative to the works used to divert the water from the natural channel. All other works should be described in the space below this note except when the water is not stored in the natural channel of the stream from which it is to be appropriated; in such case the point of diversion is the place where the water is taken from the supplying source and should be described in Paragraph 8, the center of the impounding dam described in the space below and Paragraphs 18 to 20, inclusive, should describe the diverting works. In case the application is made for the water from a number of sources, the point where the water is collected should be described as the point of diversion and the works below it described as the diverting works; those spaces it should be described as the collecting works in the space below. Each spring should also be described in the space below in accordance with note in Paragraph 1. Where the source of supply is in reality a spring area, the point of diversion is the point where the water will be collected.

The following additional facts are set forth in order to define more clearly the full purpose of the proposed appropriation:

~~1,000 c.f.s. of said water is to be diverted from the Weber River at a pt. 1000 ft. N. and 2300 ft. E. of SW cor. of Sec. 31, T. 1 S., R. 6 E.; 500 c.f.s. of said water us be diverted from Beaver Creek at a pt. N. 800 ft. and E. 200 ft. of SW cor. Sec. 16, T. 2 S., R. 6 E. The water from both sources is to be conveyed by means of a canal to and discharged into the Provo River at a pt. 2000 ft. E. and 1500 ft. S. of the NW cor. of Sec. 31, T. 2 S., R. 6 E., and allowed to flow down said river to a pt. S. 17°30' W. 800 ft. of NE cor. Sec. 7, T. 5 S., R. 4 E. where it will be stored together with sufficient water from the Provo River to fill the requirements of this application in the Deer Creek reservoir from where it will be released and allowed to flow down the natural channel of Provo River to 2 points as follows: Pt. #1 into the North Union canal and extension at a pt. S. 48°52½ W. 1320 ft. of NE cor. of Sec. 12, T. 6 S., R. 3 E., S. L. M., Pt. #2 into the Provo Reservoir canal and extension at a pt. S. 48°52½ W. 1320 ft. of the W¼ cor. of Sec. 5, T. 6 S., R. 5 E., S. L. M. and used to irrigate 75000 acres of land specified in paragraph 21.~~
