Re: SEAA 1503 (Letter Dated July 23, 2014)

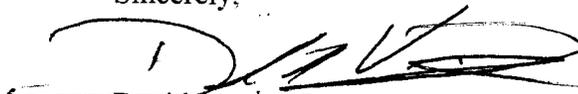

Dear Mike Silva:

We are in receipt of your letter dated July 23, 2014 regarding water uses on the Lower Fremont. It appears that you have been provided incorrect information or have misunderstood Randy's report. We have not changed our watering practices. We continue to water via sprinklers on all of the property other than the Jensen. Randy's indication that we are flood irrigating on the Jensen property is correct. This is the area associated with the Dump Road Canal. We are addressing Randy's concerns with measuring the water on the Jensen Property. I have been trying to find someone who can provide a flume to measure the water but have not had much luck. If you have a contact person who provides flumes I would appreciate the number so I can obtain one.

When we moved from flood irrigation to the sprinkler system it was discussed and agreed that counting heads would be sufficient to provide measurements. This was what was agreed to when we put the system in and should continue to be sufficient. We agree that where we have changed to the flood irrigation we need to provide a measuring device and we are working to that end.

Thank you for your consideration of our efforts to comply. If you have any additional questions please contact me. The best numbers to reach me at are (435) 491-0491.

Sincerely,

David A. Van Dyke  
Operations Manager, Aiexus XI, L.L.C.
