Re: Direct Exchange of water under E4319, E3100 and E3101

Dear Stan & John:

In a March 25, 2015 letter, the Central Utah Water Conservancy District requested a direct exchange of 24,762 AF of primary rights in Utah Lake and 57,073 AF of secondary rights in Utah Lake for CUP priority storage in Deer Creek and Jordanelle as approved under exchanges E4319, E3100 and E3101. While we don't have final numbers yet regarding the amount of system storage available for conversion, it appears there may be enough to fully operate these exchanges.

The river commissioners are hereby directed to implement the above exchanges. If the final numbers indicate less system storage is available for exchange or in the unlikely event that system storage in Utah Lake falls below the primary storage level on or before October 31, 2015, an adjustment will need to be made to ensure the exchanges are operated correctly.

Sincerely,

Kent Jones, P.E.
Utah State Engineer
