DEPARTMENT OF NATURAL RESOURCES

Division of Water Rights

MICHAEL R. STYLER KENT L. JONES
Executive Director *State Engineer/Division Director*

November 25, 2016

Price River Distribution System Water Users:

After 25 years of service, Commissioner Bob Davis will retire this coming spring. Thankfully Bob will be available to help us transition to, and train a new commissioner. Efforts to have a candidate identified for your collective approval at the upcoming annual meeting are underway.

I've enclosed a draft position description and welcome any input you have. The job will be advertised in the Sun Advocate and on etv.net with applications accepted through the 15th of January. Often the best candidates have some personal connection to the River and to the water users. That being said, we encourage you to get the word out and share this position description with any interested people you may know.

Any water user interested in working with the Distribution System Committee and the State Engineer's Office in the hiring process are welcome. If you would like to participate, please contact me by phone or email. The State Engineer recognizes the importance of this appointment to the water users and certainly appreciates and thanks each of the committee members for their time and effort.

Sincerely,
Sue Odekirk, P.E.

Price River Distribution Engineer
