Transmittal Letter for 2016 Annual Report: Beryl Enterprise

Dear Mr. Jones,

The attached pages contain the 2016 Annual Report for the Beryl Enterprise Distribution System.

In my capacity as the Beryl Enterprise Water Commissioner I have prepared this report based on water rights database research on the Internet, mapping and aerial photography, field examinations and water measurements.

This report was prepared by me and is accurate within the limitations of the measuring devices and mapping tools used on the distribution system.

The information presented is a true representation of the water distribution and regulation during the year 2016 for the Beryl Enterprise portion of the Escalante Desert in Southwestern Utah.

Sincerely,

Todd Terry
Water Commissioner
Beryl Enterprise

2017 Meeting Agenda

1. Hearing the 2016 Minutes
2. Hearing the 2016 Commissioner's Report
3. Reviewing concerns of the commissioner's work for 2016
4. Report from the Division of Water Rights
5. Hearing the 2016 Financial Report
6. Reviewing delinquent assessment accounts
7. Preparing a budget of salaries and other necessary expenses
8. Setting the distribution system assessment
9. Selecting new distribution system chairman and committee members
10. Other business

Beryl/Enterprise Water Distribution System

Minutes for the 2016 Annual Meeting on February 16, 2016

Escalante Valley Community Center, Beryl Junction, Utah

The Meeting was convened at 1:00 PM by Craig Laub, Vice Chairman.

A motion was made to accept the minutes as submitted of 2015. Brad Bowler made the motion to accept the minutes as written, Wayne Fausett Seconded the motion.

The 2015 Annual water Commissioner's Report was presented by Todd Terry. Members that were present were given a copy of the report and it was discussed. Howard Bracken made a motion to approve the commissioner's report and Wayne Fausett Seconded the motion. The motion passed.

Jared Manning, from the State Division of Water Rights, reported on some new laws that were going to involve the water users. House Bill 258 was discussed, which involved liability insurance for the water commissioner. He discussed the option of being able to use the states liability insurance which would be the most cost effective avenue for the water users.

Mike Silva reported on the snow pack situation for the area for this year it was 128% of normal at that time.

Jared Manning presented the 2015 Financial Report. Wayne Fausett made a motion to approve the financial report and Dave Bosshardt seconded. The motion passed.

The Delinquent water assessment were reviewed and discussed.

There was discussion on the 2016 budget and there were some minor changes that were made.

The motion to accept the changes was made by Dave Bosshardt and seconded by Wayne Fausett.

The 2016 Annual Water Users Assessment was discussed and the motion was made to increase it to \$21,000.00 the motion was made by Nyal Bosshardt and seconded by Wayne Fausett. The motion passed.

Craig Laub stated that 3 positions of the board were up for re-election: Craig Laub, David Bosshardt and Brad Bowler. A motion was made by Dave Bosshardt to suspend the rules and reelect the current board members. The motion was seconded by Wayne Fausett. The motion passed.

The meeting adjourned at 2:00 PM

2016 Commissioner Report

1. Mapping crop types and making changes to the system map and improvements to the water rights spread sheet was my main objectives this year.
2. The map imagery was not updated this year therefore I relied on the user's information and my observations when changing the map. If you notice something isn't quite right on the map from this year or anytime, please let me know.
3. For the Pinto surface water I removed the tags from the diversions in April and put them back on in November.
4. Newcastle reservoir filled to within 11 feet of top. Water users in Newcastle were limited to about 50% on their surface water use. When the season ended there was still 1160 acre feet in the reservoir. Total capacity is 5200 acre feet.
5. Enterprise reservoir upper and lower did not receive much runoff. The board of directors determined that there wasn't enough water to turn the system on for the year. Water users received 0% of their allotment.
6. There are several water rights at the bottom of the spreadsheet that could be utilized. If you know the owners of the water right you could ask them to temp them to your own fields.
7. There will be a new category for the Groundwater Management Plan for next year. If you plant a Pasture Grass field it will help in the consumptive use report for saving water. Please let me know if you have or will have a pasture grass mix field planted.

Clarification on Use of Supplemental Wells for the Beryl Enterprise Water Users

The purpose of this document is to clarify the appropriate use of supplemental groundwater rights so that they are used within their legal definitions. Groundwater use exceeding legal definitions increases groundwater declines that have been occurring for many years in this valley and could lead to enforcement actions. Rather than commence such actions where there may currently be a lack of consistency in understanding, I have elected to provide this communication to the water users in the Beryl Enterprise Groundwater System. In future years – this clarification having been provided – I expect enforcement actions will be commenced against those violating the terms of their water rights.

Water Right Provisions

- 1) Water may only be used at a water right's legal place of use. If a water user desires to use a water right outside of a currently approved place of use, a change application must be filed and approved by the State Engineer (Utah Code §73-3-3).
- 2) Irrigated land without a groundwater right is limited to receiving the surface water available under the surface water right(s) on that land. In a year when surface water is limited, this land will either need to be left out of production or receive a partial supply consisting only of the surface water available. Groundwater may not be used on this land without a properly approved change application (Utah Code §73-3-3).
- 3) The annual quantity limitation of an underground water right is the water right's legal sole supply acreage times the established duty of 4 acre-feet per acre. If surface water and groundwater are used together on the same land, the groundwater may be applied to the entire acreage described by the groundwater right but the groundwater user is limited to the annual quantity limitation. We recognize that since the groundwater system is currently being managed on irrigated acres this information may not be readily available. If necessary, a distribution order will be issued to require metering of groundwater use to ensure compliance with this provision (Utah Code §73-5-4).

All water users are directed to follow the provisions outlined above. Division of Water Rights staff are available to assist water users who need to take appropriate actions including filing change applications. Water users who do not follow the provisions outlined in this document may be subject to administrative and criminal penalties (Utah Code §73-2-25 to 28).

Kent Jones, P.E.
Utah State Engineer

Groundwater Management Plan Update

This is a report to publish the baseline amount of irrigation, the annual depletions, and the amount of depletion reductions achieved each year for the Beryl Enterprise Groundwater Management Plan adopted 12/21/2012.

Original Baseline Irrigation:

The Beryl Enterprise Groundwater Management Plan set the original baseline irrigation value as the total amount of acres irrigated in 2012.

Total Acres: 29,278 acres
 Net Irr. Depletion Factor: 2.4925 acre-feet/acre
 Total Depletion: 72,975 acre-feet

Modifications to the Baseline Irrigation:

Modifications to the baseline are reported and tabulated on an annual basis as follows:

2012 Modification - Reduction of 282 acres

2013-2016 Modification - None

Adjusted Total Baseline Irrigation:

The total adjusted amount of baseline irrigation is:

Acres: 28,996 acres
 Net Irr. Depletion Factor: 2.4925 acre-feet/acre
 Depletion: 72,273 acre-feet

Irrigation Acres/Depletion reductions:

The total acres irrigated by crop type, the corresponding consumptive use values, and reductions achieved from irrigation for the past reporting year are tabulated as follows:

Crop Type	Acres	Net Irr (acre-feet/acre)	Consumptive Use (acre-feet)
Alfalfa	21,638	2.4925	53,932
Grain/Alfalfa	3,197	1.8000	5,755
Grain	580	1.6625	965
Corn	3,041	1.3833	4,206
Potatoes	120	1.4050	168
Total	28,576		65,026
Baseline	28,689	2.4925	72,273
Reductions			7,247

Other Reported Depletion Reductions:

Depletion reductions achieved from reduction in uses other than irrigation that are reported to the Division of Water Rights will be accounted and are tabulated as follows:

2013-2016 report - No reductions were reported these years

Total Cumulative Depletion Reductions:

This total depletion reductions for this year are:

Irrigation: 7,247 acre-feet
 Other: 0 acre-feet
 Total: 7,247 acre-feet

Escalante Valley

Beryl-Enterprise Area

By Howard K. Christiansen

The Beryl-Enterprise area covers about 800 square miles at the southern end of Escalante Valley, southeast of the Wah Wah Mountains in Iron County, and a small area in Washington County in the vicinity of the community of Enterprise (fig. 30). Groundwater occurs in unconsolidated basin-fill deposits in the valley.

Total estimated withdrawal of water from wells in the Beryl-Enterprise area in 2015 was about 93,000 acre-feet, which is 10,000 acre-feet less than in 2014 and 4,000 acre-feet more than the average annual withdrawal for 2005–2014 (tables 2 and 3).

The location of wells in the Beryl-Enterprise area in which the water level was measured during March 2016 is shown in figure 30. The relation of the water level in selected observation wells to cumulative departure from average annual precipitation at Enterprise, to annual withdrawal from wells, and to concentration of dissolved solids in water from well (C-34-16)28dcc-3 is shown in figure 31.

Precipitation at Enterprise in 2015 was about 13.9 inches, which is about 0.1 inch less than the average annual precipitation for 1955–2015 and about 0.7 inch less than in 2014.

Water levels declined from March 2015 to March 2016 in most of the wells measured in the Beryl-Enterprise area. Water levels throughout most of the area have declined steadily since 1950 and have shown little or no recovery, even during periods of greater-than-average precipitation. For example, water-level measurements in well (C-36-16)29daa-1, about 5 miles northeast of Enterprise, have shown a decline of nearly 142 feet from March 1948 to March 2016 (fig. 31). Declines such as this are a result of continued large withdrawals for irrigation beginning in about 1950.

The concentration of dissolved solids in water samples collected from well (C-34-16)28dcc-3, located 6 miles south-southeast of Beryl, is shown in figure 31. The concentration of dissolved solids in the water sample collected in August 2015 was 549 mg/L.

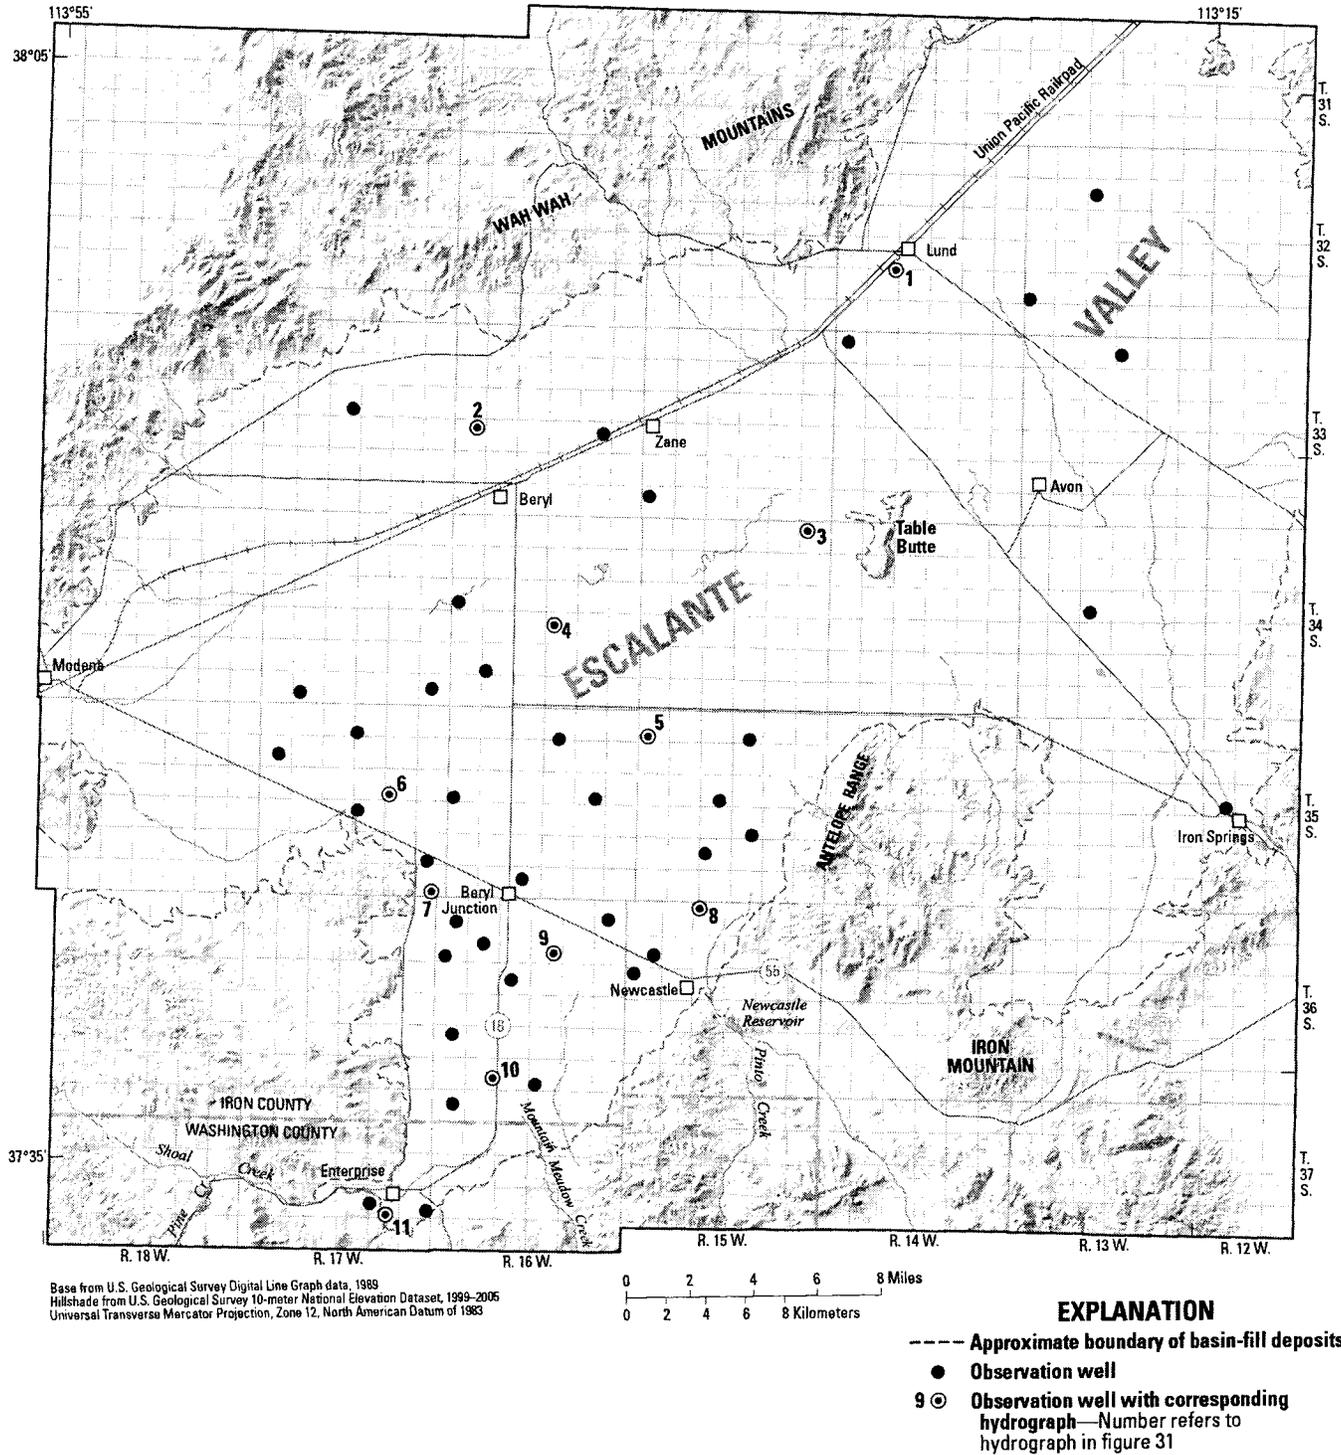

Figure 30. Location of wells in the Beryl-Enterprise area in which the water level was measured during March 2016.

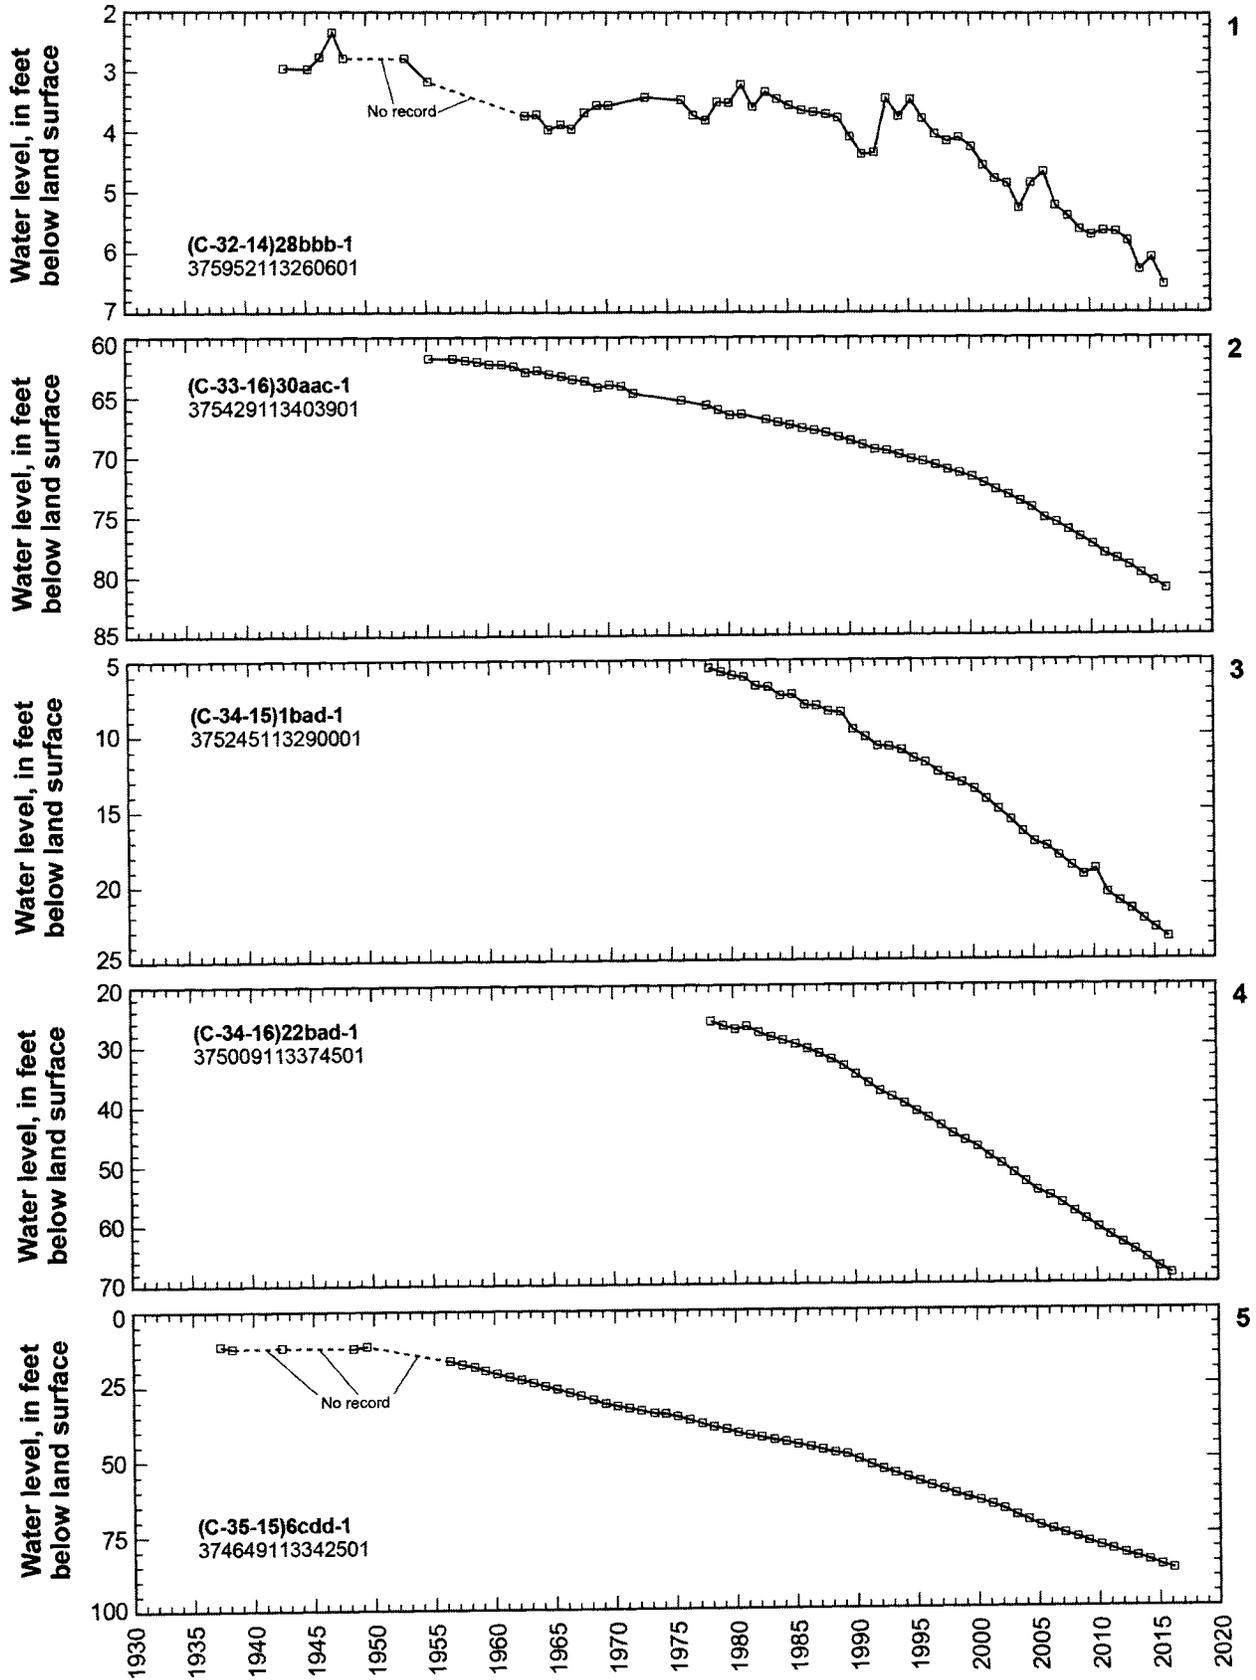

Figure 31. Relation of water level in selected wells in the Beryl-Enterprise area to cumulative departure from average annual precipitation at Enterprise, to annual withdrawal from wells, and to concentration of dissolved solids in water from well (C-34-16)28dcc-3.
