

**SPANISH FORK RIVER DISTRIBUTION SYSTEM
1996 NOTES**

MARCH 6, 1996 ANNUAL MEETING

The commissioner is concerned about the measurement and accountability of water after the completion of the CUP in Spanish Fork Canyon.

There are problems now trying to determine whether the water released from storage is CUP water or Strawberry Project water. It used to be that any CUP water was used first by the water users because it was on a use it or lose it basis (no carry over from year to year). However, CUP now lets the water users carry unused CUP storage over so they may take CUP water first or Strawberry water first. Last year, he could not determine until after the season was over how much CUP and Strawberry water each user had used.
