Mr. Albert Conrad
R.F.D. #2
Vivian Park
Provo, Utah

Mr. Elwood Conrad
R.F.D. #2, Box 587
Vivian Park
Provo, Utah

Gentlemen:

This office has been request by the State Engineer to initiate legal proceedings to have you comply with an order of the State Engineer dated April 8, 1964, relative to measuring devices and control structures on the South Fork of the Provo River.

In reviewing the Engineer's order I find you were ordered to install the following:

1. A steel weir plate in existing concrete weir box to adequately measure all the water diverted at the Upper Big Springs ditch diversion.
2. A concrete or steel measuring device in their main South Fork diversion near the road with sufficient capacity to measure 4 cfs. It is optional if a parshall flume or a suppressed weir is installed as there is sufficient grade for either.
3. Operative control gates at any diversions used along the Big Spring channel below the main diversion, this also applies to the diversion on South Fork west of the A. M. Conrad barn.

The Engineer's office advises me that as of this date you have failed to make these installations.

Page Two
June 2, 1965

If there is some reasons for your noncompliance with this order, I would appreciate hearing from you, otherwise I will request the State Engineer to again inspect your diversion on June 21, 1965, and if the above installations have not been made, I will file the appropriate action in the District Court.

Yours very truly,

Dallin W. Jensen
ASSISTANT ATTORNEY GENERAL
