re: Water Commissioner

Dear Earl:

We, the Board of Directors of the Grand County Water Conservancy District, hereby request that the State Engineer's Office appoint a water commissioner to administer and distribute all waters flowing in Mill Creek.

We appreciate the willingness of the State Engineer's Office to assist us in resolving the long standing disputes that have arisen in connection with the administration of water rights out of Mill Creek.

We fully intend to diligently pursue a final resolution of this matter.

We have instructed our legal counsel to prepare all documents necessary to effectuate the use of Moab Irrigation Company's water on the Mesa and/or the purchase of water by contract from the District for use, by exchange, on the Mesa.

Thank you again for your cooperation and assistance.

Very truly yours,

  
K.E. McDougald  
Chairman
