Duchesne- Strawberry Rivers Distribution System

Water Right Holders with Oil and Gas Exploration Use

April 30, 2019

The Duchesne – Strawberry Rivers Distribution System Board voted in favor of a special assessment billed to the Primary Water Right holder that has temporarily changed water use over to Oil and Gas Exploration appropriations, The Special Assessment amount is \$1500 per pump.

This special assessment covers additional time required by the Water Commissioner to visit and monitor water meters and pumps for oil field water use under the temporary change applications in 2018. The Water Commissioner monitored the land taken out of production, to confirm that acreage is not watered and monitor it for the entire irrigation season, as taken out of production. Work done last year is billed with this assessment.

Your account is receiving this special assessment; it is added to your normal assessment for this year, based on water use in 2018- that has been temporarily changed to Oilfield use.

Per Duchesne Strawberry Distribution System, and as voted on and approved by water users:
