Re: Direct Exchange of Water under E4319, E3100, E3101 and E398

Dear Water Commissioners:

In a March 27, 2018 letter, Central Utah Water Conservancy District (CUWCD) requested direct exchange of up to 24,762 AF of primary rights in Utah Lake and 57,073 AF of secondary rights in Utah Lake for CUP System Storage in Deer Creek and Jordanelle Reservoirs as approved under exchanges E4319, E3100 and E3101. If additional system storage was to be stored, CUWCD requested the balance to be exchanged from Utah Lake import waters under E398.

Utah Lake primary and secondary rights were delivered at 100% during WY2018 and the lake's natural contents did not exceed the conversion line. The Provo River Commissioner has indicated that CUWCD stored a total of 72,166 AF of new system storage during the water year. This water can all be converted to priority storage under E4319, E3100 and E3101. Import water will not need to be exchanged under E398. Please incorporate this exchange into your records.

Sincerely,

Jared Manning, P.E.
Assistant State Engineer

cc: Rachel Musil - Central Utah Water Conservancy District
Keith Denos - Provo River Water Users Association
John Mann - U.S. Bureau of Reclamation
