Re: Beaver River Distribution

*Beaver River
Distribution*

Dear Mr. Tracy:

Thank you for your prompt and full answer to my letter regarding water right for my place just below the Minersville Reservoir.

My impression had been that the decree which was given to the place which I now have took preference over decrees given further down the river. You undoubtedly know more about this than I do.

I can see the reason for placing the weir in the ditch at a point below where there is additional water which goes into the ditch. By the same token it seems to me reasonable also to place the weir at a point below where there is any leakage from the ditch into the river. You, of course, know much more about this than I also.

Thanking you again for your prompt and full answer, I remain

Very truly yours,

Roger W. Barnes
