Mr. Don Norseth  
State Engineer's Office  
State Capitol Building  
Salt Lake City, Utah

Dear Don:

I again want to express to you, and through you to Mr. Lambert, the sincere appreciation of Mr. McKnight, Mr. Eyre and myself in affording us an opportunity to meet with you on Thursday, June 25th.

I am today informed by Mr. McKnight that he and Mr. Strong have gotten together and they believe they have a solution which will work out from a practical standpoint in getting the water from Three Creeks down to Rocky Ford under Mr. Lambert's order. We shall keep you advised as to the developments.

It is my understanding that Mr. Strong proposes that he will retain sufficient in the Three Creeks Reservoir to meet the needs and will not release it until the seven canals using direct flow are cut off, which will be in the next short while. This will then give him much less of a policing problem in getting the water on down to Rocky Ford.

There remains, however, the matter of the proper computation and application of the formula to the 4 1/2 second feet which, according to your previous order, was issued in 1959 was applicable to the first 4 1/2 feet in the river and then carried over for application of the general formula to the remainder. Mr. Strong indicates he has not been able to locate his copy of the order and I would certainly appreciate your kindness in furnishing it to him and Mr. McKnight has asked if you would send him a copy directly inasmuch as he has worn out the copy that he had.

Kindest personal regards and sincere thanks for your many courtesies.

Very truly yours,

  
ALLEN H. TIBBALS
