

EXPLANATORY.

NOTE--Never use the blank 3a except when it is intended to store the water to be appropriated. In such cases the total quantity of water to be stored should be given in acre feet in blank 3a and the maximum flow of water to be stored at any time from the supplying source for storage purposes specified in cubic feet per second in the space below. The legal subdivisions of land covered by the reservoir should be named, and the periods of time during which the water is to be stored and released should be given in the space below. If the water is released from the reservoir into the natural channel of the stream, the point where it is diverted from such stream should be described in blank No. 7, and the data given in blanks 8-17 inclusive should be relative to the works used to divert the water from the natural channel. All other works should be described under "explanatory" except where the water is not stored in the natural channel of the stream supplying it. In such cases the "point of diversion" is the place where the water is taken from the supplying source and should be described in blank No. 7, and blanks 8 to 17 inclusive should be used to describe diverting works.

The following additional facts are set forth in order to more clearly define the full purpose of the proposed appropriation:

At a point whence the 1/4 section corner on the eastern boundary line of Sec. 33, T. 5 S., R. 3 E., S.L.R. & N. bears N. 57°30' E., 788 feet, the twenty second feet of water of Bridal Veil Falls Creek hereinbefore mentioned will be utilized under a head of 792 feet to produce power by the Pelton wheel aforesaid for pumping purposes to the end that not only the said twenty second feet (which is the only water hereby sought to be appropriated) but also other waters of Provo River and said Utah Lake System naturally flowing to or which may be conveyed to said point to the extent of an additional fifty cubic feet per second of time (belonging to The Telluride Power Company, a corporation, but not hereby claimed or appropriated by this appropriation) may be pumped into a flume (dimensions of which have hereinbefore been given) at or near a point whence the 1/4 section corner aforesaid bears N. 85°06' E., 787 feet; all the waters aforesaid will at the point last above fixed be mingled with other waters flowing in said flume and be conducted by means of said flume to a pressure box situate in the N.W. 1/4 of Sec. 7, T. 6 S., R. 3 E., S.L.R. & N., and from thence by means of a pipe line (diameter of which has hereinbefore been given) to a point situate in the S.W. 1/4 of the N.W. 1/4 of Sec. 7, T. 6 S., R. 3 E., S.L.R. & N., where all the above mentioned water of Bridal Veil Falls Creek will be utilized under a head of 350 feet, for the purposes and at the places set forth in applicant's answer to query No. 23 herein.

L. L. Nunn

APPLICATION

OF

I. L. Nunn

TO

APPROPRIATE WATER

FROM

Bridal Veil Falls Creek

FOR

POWER PURPOSES.

Recorded in book E-2 of Applications
to Appropriate Water, on pages 366
to

Rules and Regulations.

- All applications must be dated at place where made and signed by applicant.
- Erasures must not be made on applications returned for correction, but any matter may be removed from the application by running a red line through it.
- All corrections must be made in red ink and be plainly written
- Applications returned to applicants for correction must be resubmitted to the office within sixty days or the priority determined by the original receiving date will be lost.
- Applications resubmitted after the expiration of sixty days will be treated as new applications in all respects (See Section 36, Chapter 156, Session Laws of Utah, 1907)
- No application or proof of appropriation will be marked "received" until the required fees have been paid.
- Applicants will be informed by this office when the cost of publishing notice of application is due.
- Applicants must advance cost of publication within ten days after having been so informed
- Request for extension of time to complete work will not be considered unless accompanied by sufficient affidavit and required fee.
- Do not "back" the application or make any endorsements on page 3.

Fees Required by Law for State Treasury.

For examining and filing applications to appropriate 10 cubic feet per second of water or less	\$2.50
For examining and filing applications to appropriate more than 10 cubic feet per second of water a fee of \$2.50 plus \$1.00 for each cubic foot per second in excess of that flow.	
For approving and recording completed application	2.50
For examining and filing written proof of appropriation	1.00
For examining and filing map, profile and drawings that are part of the proof of appropriation	5.00
For issuing certificate of appropriation	1.00
For filing affidavit or any other paper	1.00
Applicants will save time and expense by familiarizing themselves with the law before making applications.
