Salt Lake City, Utah 84116

Transmittal Letter for 2019 Annual Report: Beryl Enterprise

Dear Mr. Clayton,

The attached pages contain the 2019 Annual Report for the Beryl Enterprise Distribution System.

In my capacity as the Beryl Enterprise Water Commissioner I have prepared this report based on water rights database research on the Internet, mapping and aerial photography, field examinations and water measurements.

This report was prepared by me and is accurate within the limitations of the measuring devices and mapping tools used on the distribution system.

The information presented is a true representation of the water distribution and regulation during the year 2019 for the Beryl Enterprise portion of the Escalante Desert in Southwestern Utah.

Sincerely,

Todd Terry
Water Commissioner
Beryl Enterprise

2020 Meeting Agenda

1. Hearing the 2019 Minutes
2. Hearing the 2019 Commissioner's Report
3. Reviewing concerns of the commissioner's work for 2019
4. Report from the Division of Water Rights
5. Hearing the 2019 Financial Report
6. Reviewing delinquent assessment accounts
7. Preparing a budget of salaries and other necessary expenses
8. Setting the distribution system assessment
9. Selecting new distribution system chairman and committee members
10. Other business

Beryl/Enterprise Water Distribution System
Minutes for the 2019 Annual Meeting on February 19, 2019
Escalante Valley Community Center, Beryl Junction, Utah

The Meeting was convened at 3:02 PM by Mike Brown, Chairman.

The minutes of the 2018 Annual Meeting were reviewed. Marlo Reber made the motion to accept the minutes as submitted, Dave Bosshardt seconded the Motion and the Motion Passed.

The 2018 Annual Water Commissioner's Report was presented by Todd Terry. Members that were present at the meeting were given a copy of the report and highlights of the year were reviewed. Maps and Reports are available to view on terrybomb.com. Todd discussed some of the water rights that are not being used currently. He has a report on page 27 of the annual report book. The Water Users showed their appreciation to Todd for his work and effort that he has put in the past year. Dave Bosshardt made a motion to accept the Commissioner's Report as reviewed. This was seconded by Marvin Bracken. The Motion carried. Todd talked about the aerial photo of the valley and would like to have the valley flown and have new pictures taken.

Mike Silva reported on the snow pack situation for the area for this year. He talked about how it is currently at 171% of normal. He also talked about putting some meters on Todd's pumps to monitor and get a idea of what is actually being pumped on average. He then discussed the need to call and let Todd know when we are planting different crops so that Todd can record it.

Jared Manning, From the state Division of Water Rights, Presented the 2018 Financial Report. He discussed battery replacement on the reservoir system. Jared thought it would be a good idea to budget some money for supplies and equipment. The Motion to accept the Report was made by Ladel Laub and 2nd by Marlo Reber. The Motion Passed.

The Delinquent Water Assessment was reviewed and discussed.

The financial Budget for 2019 was discussed. The water users decided to increase Todd's Salary to 19000.00. The Social Security had a increase to 1454.00. Insurance remained the same at \$240.00. The State engineer Assessment increased to 1511.00. A supply budget was added to the amount of \$100.00. The new Budget for 2018 will be 22305.00. Dave Bosshardt made a motion to accept the budget amount at \$22305.00 and Marvin Bracken seconded. The motion carried.

The 2019 Assessment was discussed and a motion was made to keep the amount for 2019 at 21000.00. This was made by Ladel Laub and 2nd by Rick Whitelaw. The motion carried.

Mike Brown stated that 3 Positions were up for re-election. Craig Laub, Brad Bowler, and Dave Bosshardt. Kevin Woods made a motion to suspend the rules and keep Craig, Dave, and Brad on the Board and also leave the Chair, Vice, and secretary the same. The motion was seconded by Marlo Reber. The Motion carried.

Jared Manning gave an update on the Holt Farms application and what was going on there. Some questions were also asked about the reservoir and underground water and how the water rights are allocated on this. The State Representative discussed and answered these questions.

The Meeting adjourned at 3:40 PM.

2019 Commissioner Report

1. This has been an interesting year for me being the first commissioner in Utah to incorporate commercial water in with the standard four acre feet per acre method. Reading meters and calculating depletion was an exciting adventure.
2. If you would like to see a history of the system maps and reports go to: www.terrybomb.com and take a look.
3. The map imagery was again not updated this year therefore I relied on the user's information and my observations when changing the map. If you notice something isn't quite right on the map from this year or anytime, please let me know.
4. For the Pinto surface water I removed the tags from the diversions in April and put them back on in November.
5. Newcastle reservoir filled to capacity and ran over the spillway from 28 Mar until 21 Jun providing high water to all it's users and a full allotment.
6. Enterprise reservoir filled to 80% capacity and the users were allowed 100% of their allowed water.
7. I would like to thank everyone for all the help I received from the water users this year as I updated the map and spreadsheet. I would also like to thank Nathan Moses and the staff at the Cedar City office and Mike Silva in the SLC office for all their help.

Distribution Engineers Report for 2019

Forecast and Water Outlook: as of January 29th, 2020

2019 was a great water year, plenty of snowpack with a slow spring warmup. Runoff came down at a manageable rate and extended much into July in most areas. Base flow after July seemed enhanced despite the general lack of moisture for most of the state from July through October. Storm patterns were different from the dry previous year in 2018, when most of the storms veered to the North and East of the state, bypassing us. For 2019 storm tracks came in over land and stagnated overhead, that's why we got long duration snowfall events.

Then due to a slow warm up the Snowpack remained into early summer as it took some time to melt out. This was to our advantage the system was able to handle the runoff volume over a longer time, despite this large snowpack. There were some high flows and damage in some areas. However, this helps to recharge our basins. Despite some flooding be thankful it wasn't worse than it could have been. Spring 2019 we saw late summer monsoon season happen earlier from March- May with 6.46 inches of rain. When that ended, there was an extended periods of no precipitation. Record was set of 155 days with no precipitation in Saint George. Even so, the rivers seemed to stay up about 75% to the end of the season.

For 2020: Snow levels are up again this year showing a promising start to our snowpack. Still too early to tell but at this writing, levels are at 156 % for Southwestern Utah. This condition is true statewide where most all basins are running ahead of last year's numbers at this same time. This year is on track to be another good one, let's hope so. I will share the latest Snotel report.

Mapping:

For Mapped systems, we are dealing with 2016 aerial photography. There have been many changes in the basin, mainly wheel lines were replaced with center pivots. This causes the Water Commissioner to spend more time with field verification. We do have satellite imagery available but the resolution is not very accurate. I do not have any status on when high-resolution air photography will be done again. Please take time to review the spreadsheet and maps for accuracy and contact the water commissioner or the Cedar City office if you have any questions or corrections.

Other Activity:

The State Engineer Kent Jones retired in November and a new State Engineer will be confirmed by the legislature during their session. Boyd Clayton is the interim State Engineer at present. There are a number of legislative actions concerning water in this session. Too much to discuss her but I suggest you get educated on these.

Groundwater Management Plan Update

This is a report to publish the baseline amount of irrigation, the annual depletions, and the amount of depletion reductions achieved each year for the Beryl Enterprise Groundwater Management Plan adopted 12/21/2012.

Original Baseline Irrigation:

The Beryl Enterprise Groundwater Management Plan set the original baseline irrigation value as the total amount of acres irrigated in 2012.

Total Acres: 29,278 acres
 Net Irr. Depletion Factor: 2.4925 acre-feet/acre
 Total Depletion: 72,975 acre-feet

Modifications to the Baseline Irrigation:

Modifications to the baseline are reported and tabulated on an annual basis as follows:

2012 Modification - Reduction of 282 acres

2013-2018 Modification - None

2019 Modification - Reduction of 930 acres (based on temporary change applications t44536 & t44703)

Adjusted Total Baseline Irrigation:

The total adjusted amount of baseline irrigation is:

Acres: 28,066 acres
 Net Irr. Depletion Factor: 2.4925 acre-feet/acre
 Depletion: 69,955 acre-feet

Irrigation Acres/Depletion reductions:

The total acres irrigated by crop type, the corresponding consumptive use values, and reductions achieved from irrigation for the past reporting year are tabulated as follows:

Crop Type	Acres	Net Irr (acre-feet/acre)	Consumptive Use (acre-feet)
Alfalfa	20,494.17	2.4925	51,081.72
Alfalfa to Corn	734.02	2.4925	1,829.56
Grain/Alfalfa	2,363.34	1.8000	4,254.02
Grain	537.41	1.6625	893.44
Corn	2963.34	1.3833	4,099.19
Irrigated Pasture	525.28	1.89	992.79
Total	27,617.57		63,150.71
Baseline	28,066	2.4925	69,955
Reductions			6,804

Other Reported Depletion Reductions:

Depletion reductions achieved from reduction in uses other than irrigation that are reported to the Division of Water Rights will be accounted and are tabulated as follows:

2013-2018 report - No reductions were reported these years

2019 - Temporary Change Applications t44536 & t44703 converted the nature of use of 930 acres of irrigation use to commercial use. These commercial uses were evaluated to allow the user to deplete 2,455 acre-feet of water. The water user only consumed 2,399 acft of water. 56 acre-feet of depletion was reduced.

Total Cumulative Depletion Reductions:

This total depletion reductions for this year are:

Irrigation: 6,804 acre-feet
 Commercial: 56 acre-feet
 Total: 6,860 acre-feet

Escalante Valley

Beryl-Enterprise Area

By Douglas V. LaBonté

The Beryl-Enterprise area covers about 800 square miles at the southern end of Escalante Valley, southeast of the Wah Wah Mountains in Iron County, and a small area in Washington County in the vicinity of the community of Enterprise (fig. 30). Groundwater occurs in unconsolidated basin-fill deposits in the valley.

Total estimated withdrawal of water from wells in the Beryl-Enterprise area in 2017 was about 90,000 acre-feet, which is 5,000 acre-feet less than in 2016 and 3,000 acre-feet less than the average annual withdrawal for 2007–2016 (tables 2 and 3).

The location of wells in the Beryl-Enterprise area in which the water level was measured during March 2018 is shown in figure 30. The relation of the water level in selected observation wells to cumulative departure from average annual precipitation at Enterprise, to annual withdrawal from wells, and to concentration of dissolved solids in water from well (C-34-16)28dcc-3 is shown in figure 31.

Precipitation at Enterprise in 2017 was about 16.0 inches, which is 1.9 inches more than the average annual precipitation for 1955–2017 and about 0.2 inch less than in 2016.

Water levels declined from March 2017 to March 2018 in most of the wells measured in the Beryl-Enterprise area. Water levels throughout most of the area have declined steadily since 1950 and have shown little or no recovery, even during periods of greater-than-average precipitation. For example, water-level measurements in well (C-36-16)29daa-1, about 5 miles northeast of Enterprise, have shown a decline of nearly 140 feet from March 1948 to March 2018 (fig. 31). These aforementioned declines are the result of continuous large withdrawals for the purpose of irrigation beginning around 1950.

The concentration of dissolved solids in water samples collected from well (C-34-16)28dcc-3, located 6 miles south-southeast of Beryl is shown in figure 31. The concentration of dissolved solids in the water sample collected during June 2017 was 645 mg/L.

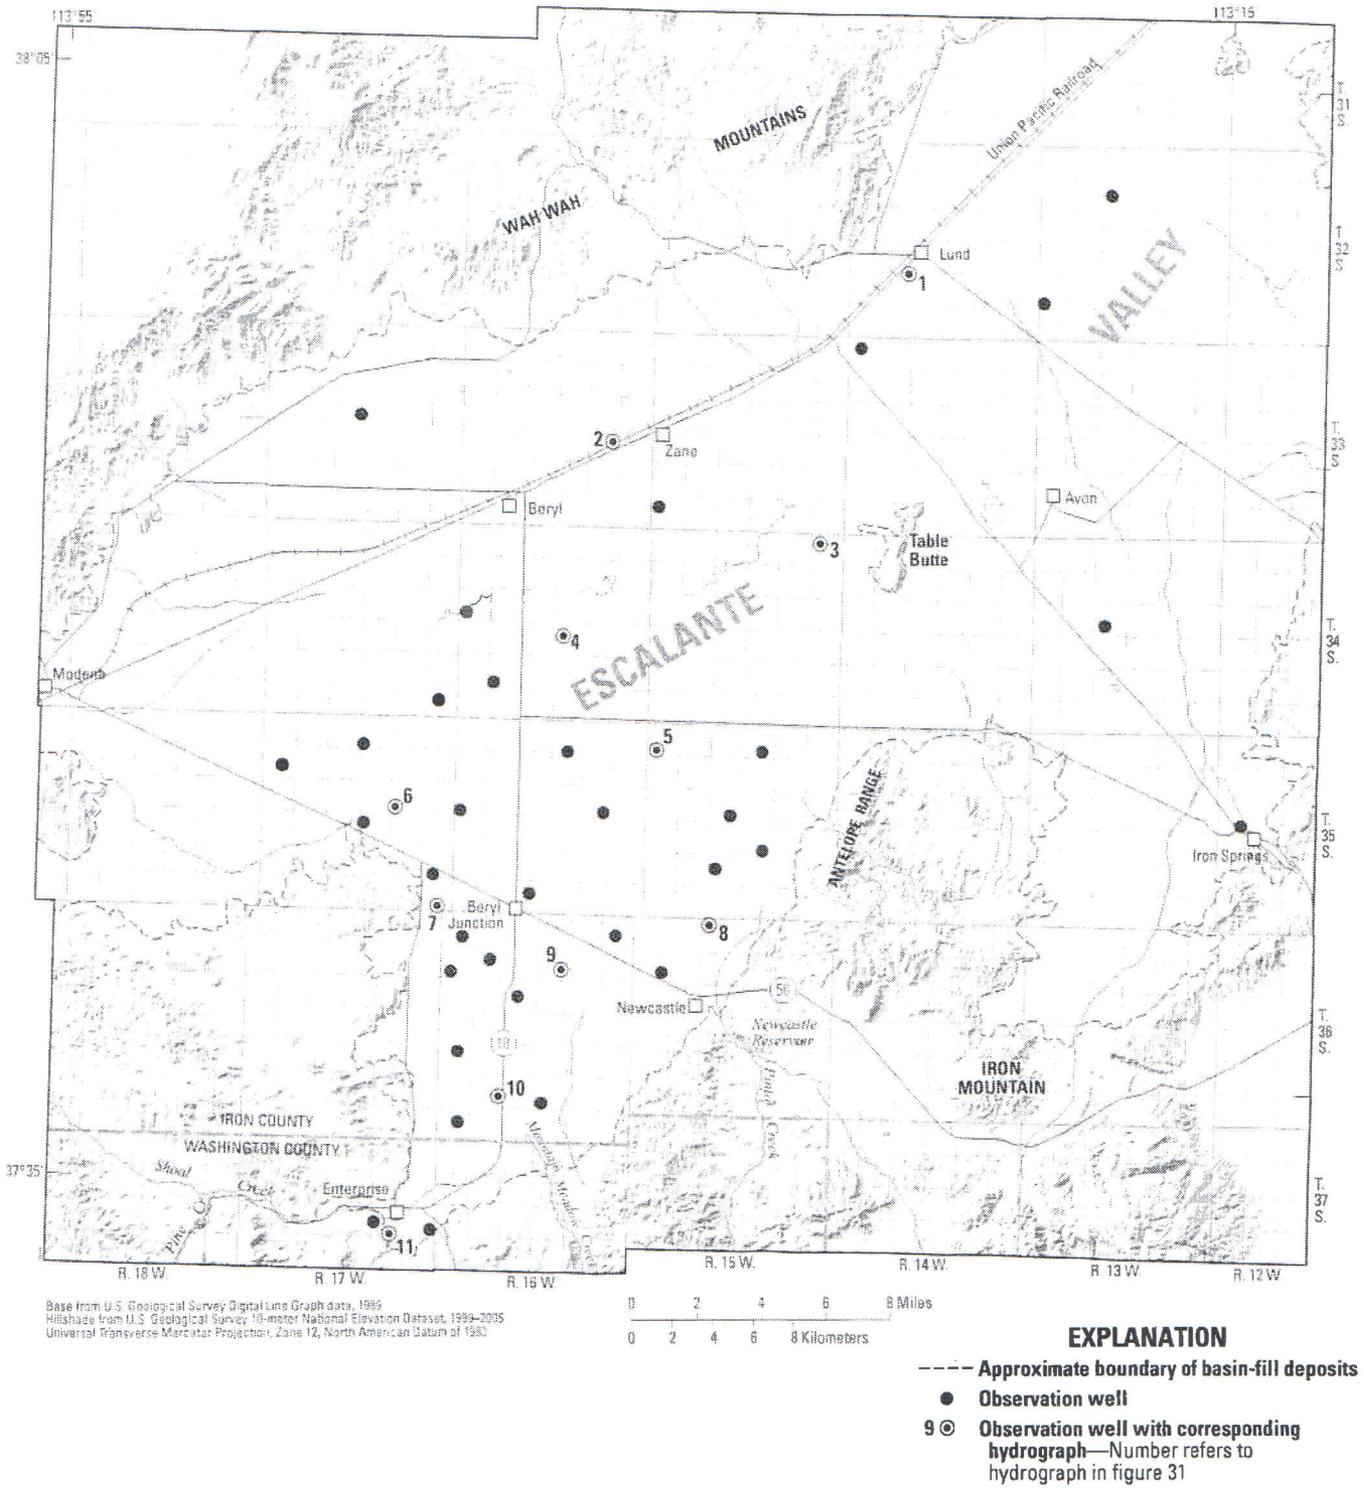

Figure 30. Location of wells in the Beryl-Enterprise area in which the water level was measured during March 2018.

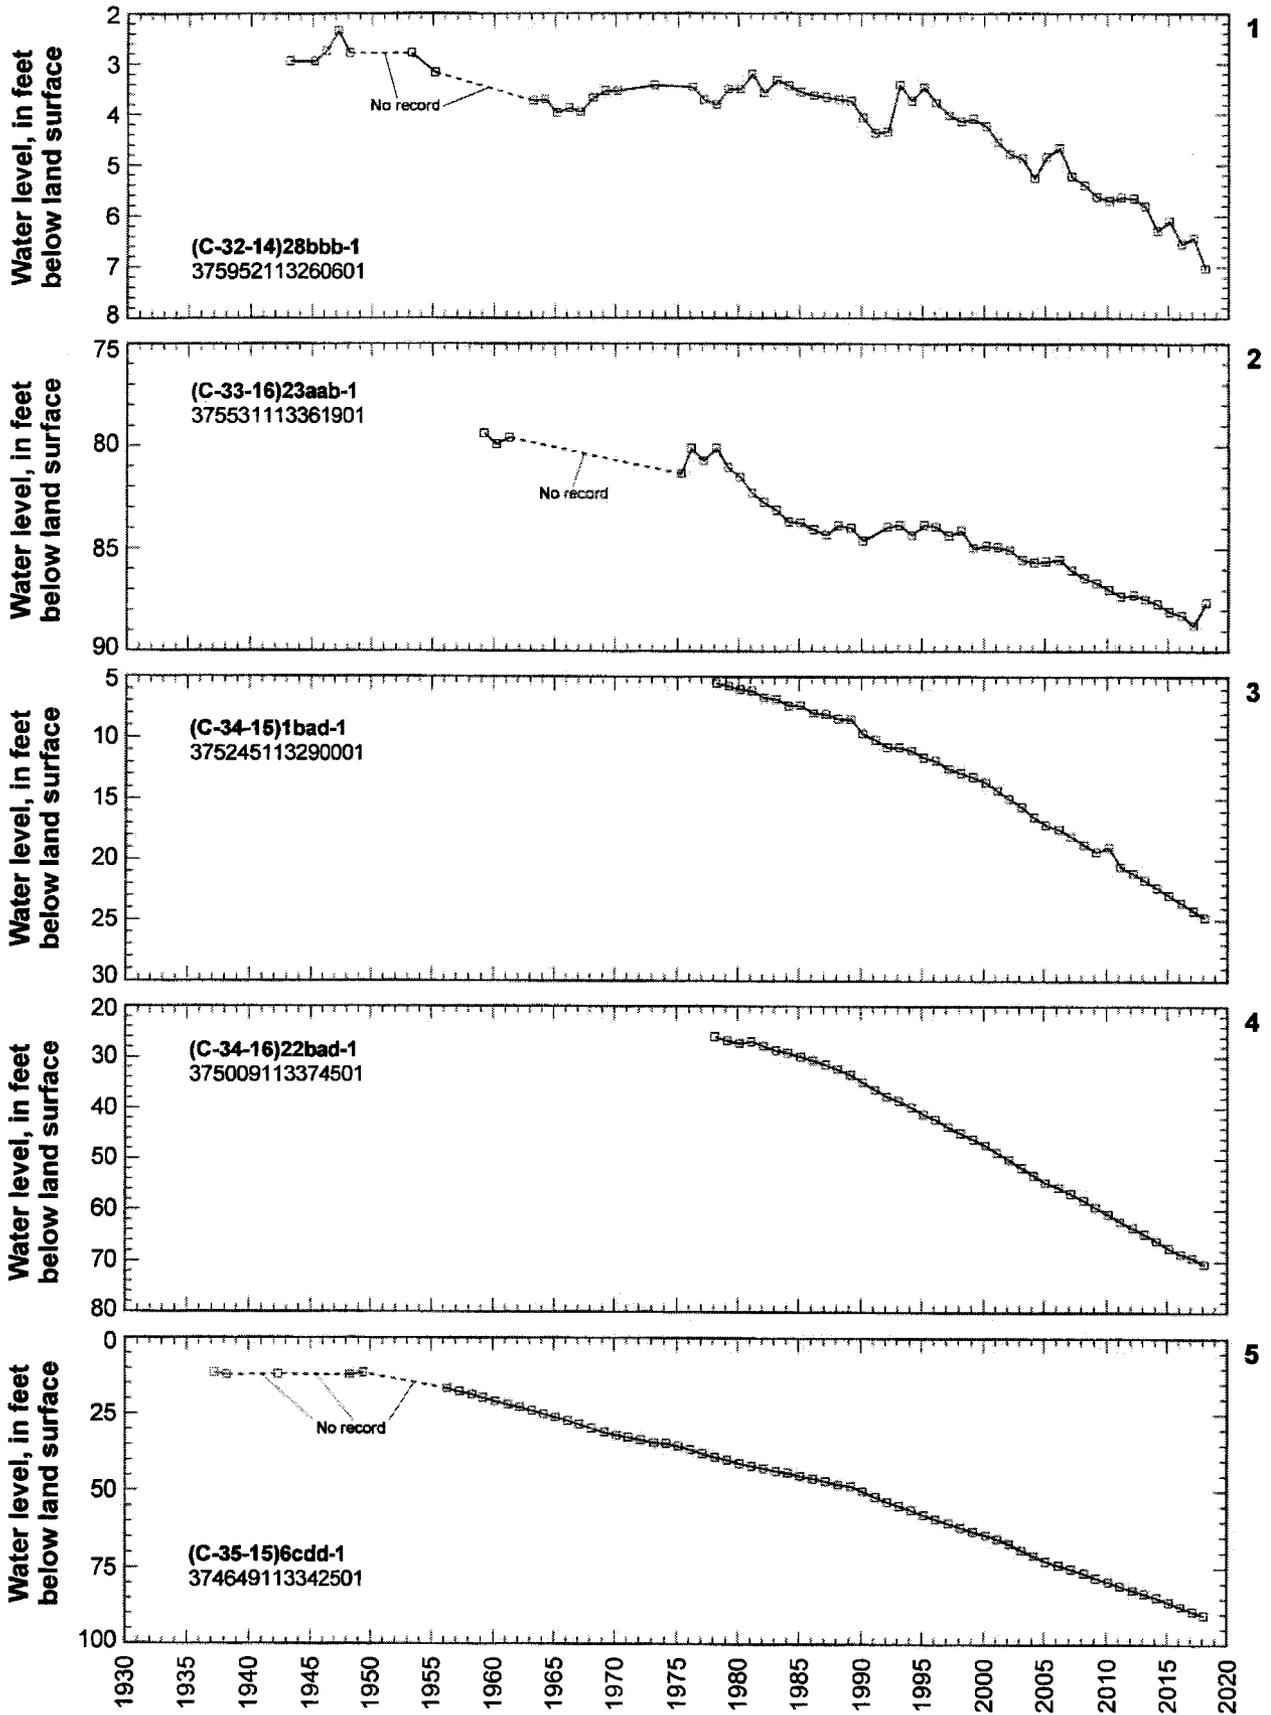

Figure 31. Relation of water level in selected wells in the Beryl-Enterprise area to cumulative departure from average annual precipitation at Enterprise, to annual withdrawal from wells, and to concentration of dissolved solids in water from well (C-34-16)28dcc-3.

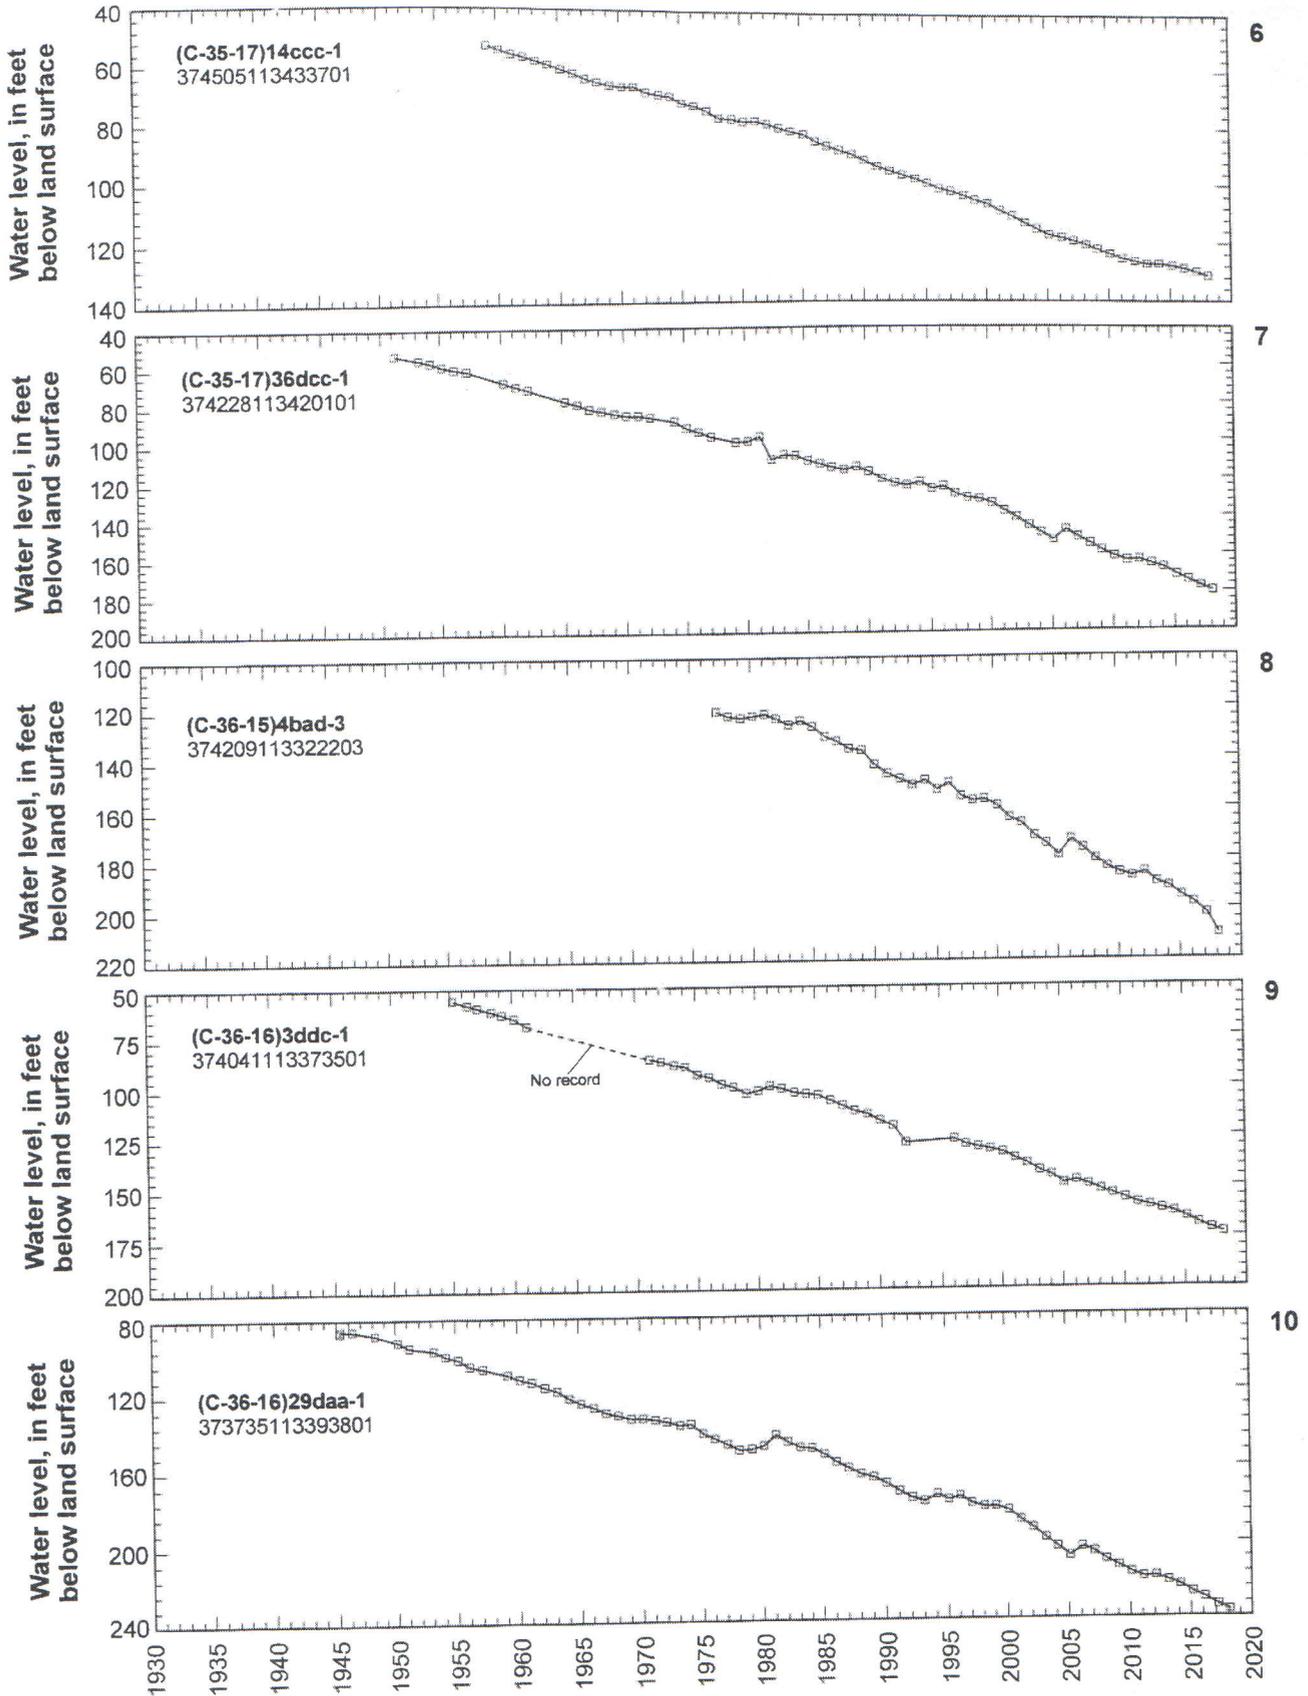

Figure 31. Relation of water level in selected wells in the Beryl-Enterprise area to cumulative departure from average annual precipitation at Enterprise, to annual withdrawal from wells, and to concentration of dissolved solids in water from well (C-34-16)28dcc-3.—Continued
