IN THE MATTER OF THE GENERAL DETERMINATION OF THE RIGHTS TO THE USE OF ALL OF THE WATER, BOTH SURFACE AND UNDERGROUND, WITHIN THE DRAINAGE AREA OF THE UTAH LAKE AND JORDAN RIVER IN UTAH, SALT LAKE, DAVIS, SUMMIT, WASATCH, SANPETE, AND JUAB COUNTIES IN UTAH

SALT LAKE COUNTY EAST DIVISION, MILL CREEK SUBDIVISION (57-15)

Salt Lake County Civil No. 365729832

Honorable Laura S. Scott

**NOTICE TO WATER USERS WITHIN THE ABOVE-DESCRIBED DRAINAGE AREA:**

This is the Proposed Determination of Water Rights for the Salt Lake County East Division, Mill Creek Subdivision, Area No. 57, Book 15, of the Utah Lake and Jordan River General Adjudication. The Division of Water Rights has prepared the Proposed Determination as required by Utah Code § 73-4-11. The Proposed Determination is the State Engineer's report and recommendation to the Court as to how all rights to the use of the water in the Mill Creek Subdivision should be determined. A copy of the Proposed Determination has been filed with the Clerk of the Third District Court in Salt Lake City, Utah. Additional printed copies are available, upon payment of printing costs, from the Division of Water Rights at 1594 W. North Temple, Suite 220, Salt Lake City, Utah, (801) 538-7240. An electronic copy in PDF format is also available for download free of charge from the website of the Division of Water Rights at [www.waterrights.utah.gov](http://www.waterrights.utah.gov).

You are hereby notified that under Utah Code § 73-4-11(2), any person claiming a water right in the Mill Creek Subdivision who is dissatisfied with the Proposed Determination may object to it, but only in accordance with the following requirements: the objection must be in writing and filed in the Third District Court, in Salt Lake County, 450 South State Street, P.O. Box 1860, Salt Lake City, Utah 84114, within ninety (90) days after being served with notice of completion of the Proposed Determination. Service of the Proposed Determination is effective on the date the notice is mailed. A claimant who wishes to object to the Proposed Determination should also serve a copy of the objection on counsel for the State Engineer at the address shown below.

IN THE THIRD JUDICIAL DISTRICT COURT IN AND FOR SALT LAKE COUNTY, UTAH

IN THE MATTER OF THE GENERAL DETERMINATION OF THE RIGHTS TO THE USE OF ALL OF THE WATER, BOTH SURFACE AND UNDERGROUND, WITHIN THE DRAINAGE AREA OF UTAH LAKE AND JORDAN RIVER IN UTAH, SALT LAKE, DAVIS, SUMMIT, WASATCH, SANPETE, AND JUAB COUNTIES IN UTAH

PROPOSED DETERMINATION OF WATER RIGHTS IN THE UTAH LAKE AND JORDAN RIVER GENERAL ADJUDICATION  
SALT LAKE COUNTY EAST DIVISION  
MILL CREEK SUBDIVISION  
NO. 57, BOOK 15

Salt Lake County Civil No. 365729832  
Honorable Laura S. Scott

Teresa Wilhelmsen, P.E., State Engineer of the State of Utah, respectfully submits this report and recommendation to the Court.

**1. Geographical Area Covered.** This General Adjudication, known as the Utah Lake and Jordan River General Adjudication, includes all water sources, both surface and underground, within the drainage of the Utah Lake and Jordan River in Utah, Salt Lake, Davis, Summit, Wasatch, Sanpete, and Juab Counties in Utah. This Proposed Determination is limited to water rights with points of diversion in the Mill Creek Subdivision of the Salt Lake County East Division of the Utah Lake and Jordan River General Adjudication. The Mill Creek Subdivision is the area on the map shown on page viii. The Utah Division of Water Rights has designated the Proposed Determination for this area as Area 57, Book 15.

**2. Commencement.** On September 1, 1944, the Court ordered the State Engineer to make a determination and adjudication of all rights to the use of water of Utah Lake and Jordan River and their tributaries in Utah and Salt Lake Counties. On June 21, 1972, the Court issued an order clarifying that the adjudication area includes all the rights to the use of water, both surface and underground, within the drainage area of Utah Lake and Jordan River and their tributaries in Utah, Salt Lake, Davis, Summit, Wasatch, Sanpete, and Juab Counties. The Court also ordered that the title of this action be amended to read, “In the Matter of the General Determination of the Rights to the Use of

all of the Water, Both Surface and Underground, Within the Drainage Area of the Utah Lake and Jordan River in Utah, Salt Lake, Davis, Summit, Wasatch, Sanpete and Juab Counties in Utah.”

**3. State Engineer’s Activity.** The State Engineer has followed the requirements of Title 73, Chapter 4 of the Utah Code. She has given the required notices, served and published summons, prepared and filed a List of Unclaimed Rights of Record with the Court, completed hydrographic surveys, and evaluated claims from water users within the area. Prior to making the recommendations in the Proposed Determination, the State Engineer has given careful consideration to the Statements of Water User’s Claim filed in the Mill Creek Subdivision. To the best knowledge of the State Engineer, this Proposed Determination contains all rights to the use of water with points of diversion located within the Mill Creek Subdivision for which a claim was timely filed or for which the Court has excused the late filing.

Contemporaneously with the filing of this Proposed Determination, the State Engineer has published and served notice of the Proposed Determination on each claimant of record within the Mill Creek Subdivision as required by Utah Code § 73-4-11. The Proposed Determination is available on the Division of Water Rights website at [www.waterrights.utah.gov](http://www.waterrights.utah.gov) free of charge.

**4. Beneficial Use.** In preparing the Proposed Determination, the State Engineer has based her recommendations on Utah water law, including the

principle that beneficial use shall be the basis, measure, and limit of the right to the use of water. Utah Code § 73-1-3. The recommended limits of each water right, based on actual historical beneficial use, are included in the Proposed Determination.

Water rights may be subject to forfeiture for nonuse if no beneficial use of the water right occurs for the statutory period, beneficial use is not excused during the statutory period, and no forfeiture exemption applies. Prior to May 5, 2008, the statutory period for forfeiture in Utah Code § 73-1-4 was five years. In 2008, the Utah legislature amended the statutory forfeiture period to seven years, effective May 5, 2008. Therefore, water rights for which partial or no beneficial use was made for a continuous period of five years prior to May 5, 2008, or seven years if the nonuse period includes time after May 5, 2008, are subject to forfeiture. Water rights recommended for total forfeiture are listed in the *Forfeited Rights* section of the Proposed Determination, as explained in Paragraph 9 below. Water rights that are recommended for partial forfeiture are not listed separately, but the descriptions of the water rights in the Proposed Determination are limited to those characteristics or portions that have been perpetuated by beneficial use.

**5. Water Rights.** To be included in the Proposed Determination and recognized in the General Adjudication, a water right, regardless of its nature or origin, must be represented by a valid Statement of Water User’s Claim.

Under Utah law, water rights can be acquired in only three ways: (1) by application to the State Engineer’s Office, also known as the Division of Water Rights; (2) by diligent use prior to the enactment of the statutes establishing the application process as the sole method of appropriation (“diligence rights”); and (3) by adverse use or adverse possession.

Currently, the only way to initiate a new water right is by application to the State Engineer’s Office. If the State Engineer approves an application, the applicant may proceed, within a set time, to divert the water and put it to beneficial use. After putting the water to use in accordance with the application, the applicant files proof of beneficial use and, if the State Engineer determines that the water is put to use as contemplated by the application

approval, the State Engineer issues a certificate of appropriation perfecting the right.

Diligence claims are based on the continuous beneficial use of water dating back to before March 12, 1903 for surface water, or March 22, 1935 for underground water. Prior to these dates, a water user could acquire a water right by diverting and using the water for a beneficial use. After those dates, new water rights could be acquired only by application to the State Engineer’s Office.

Prior to 1939, water rights could also be acquired by the adverse use of a valid right. In 1939, the Utah Legislature amended the statutes to prohibit acquisition of a water right by adverse use or adverse possession.

This Proposed Determination does not include applications that were approved but unperfected as of December 15, 2017. The absence of such applications in the Proposed Determination does not affect the validity of water rights perfected after that date.

**6. Prior Decree.** On August 1, 1913, the Third Judicial District Court for Salt Lake County entered a decree in *Young v. Gordon et al* (the “1913 Mill Creek Decree”). The 1913 Mill Creek Decree adjudicated the water rights “to all waters of Mill Creek Canyon, and the water tributary thereto, in Salt Lake County, Utah, . . . the rights of the parties being all the users of said waters of said Mill Creek . . .” The 1913 Mill Creek Decree identified awardees and established a class-based system to guide equitable distribution of the source. The State Engineer has evaluated each claim that can be tied to an award in the 1913 Mill Creek Decree and incorporates these awards and classes as follows:

*House-Use Rights* – The 1913 Mill Creek Decree awarded “House-Use Rights.” The House-Use Rights recommended in this Proposed Determination are entitled to the quantity of water and beneficial uses described in the individual rights, irrespective of the priority date of subsequent Primary, Second Class, and Surplus awards, subject to the following modifications. When the natural flow of Mill Creek is

insufficient to satisfy all House-Use Rights, distribution of available water is by priority date.

*Primary Rights* – Water rights described as Primary Rights are entitled to the quantity of water and beneficial uses described in the individual rights subject to the following modifications. When the natural flow of Mill Creek is insufficient to satisfy all Primary Rights, distribution of available water is on a pro rata basis according to their respective flow rates. Primary Rights shall only be distributed when the natural flow of Millcreek is sufficient to satisfy all House-Use Rights.

*Second Class Rights* – Water rights described as Second Class Rights are entitled to the quantity of water and beneficial uses described in the individual rights subject to the following modifications. When the natural flow of Mill Creek is insufficient to satisfy all Second Class Rights, distribution of available water is on a pro rata basis according to their respective flow rates. Second Class Rights shall only be distributed when the natural flow of Millcreek is sufficient to satisfy all Primary Rights.

*Surplus Rights* – Water rights described as Surplus Rights are entitled to the quantity of water and beneficial uses described in the individual rights subject to the following modifications. When the natural flow of Mill Creek is insufficient to satisfy all Surplus Rights, distribution of available water is on a pro rata basis according to their respective flow rates. Surplus Rights shall only be distributed when the natural flow of Millcreek is sufficient to satisfy all Second Class Rights.

The flow of Mill Creek shall be measured near the mouth of the canyon, at a point upstream from the points of diversion of rights described as 1913 Mill Creek Decree awards.

**7. Time-Based Interest.** Some rights are described with a time-based interest in the flow rate listed as the quantity of water. Where so described, the claimant is permitted to proportionately reduce the flow rate and increase the duration of authorized diversion. For example, a right with a 1 cfs quantity of water and a time-based interest of 8/168 may divert 0.5 cfs for 16/168ths

of the time. This time-based variability can only be exercised when doing so will not interfere with senior rights.

**8. Share Statements.** Not applicable.

**9. Disallowed Rights and Claims.** A claim for a water right may be recommended to be disallowed for two reasons: (1) that the water right has been forfeited, or (2) that the claim is invalid.

A claim is listed in the *Forfeited Rights* section if no beneficial use of water was made for a continuous period of five years prior to May 5, 2008, or seven years if the nonuse period includes time after May 5, 2008.

A claim is listed in the *Invalid Claims* section if the water was not placed to beneficial use in accordance with applicable law at the time of the original appropriation or there is insufficient evidence to support the validity of the claim. Examples of invalid claims may include a diligence claim that has not been substantiated by sufficient evidence of diligent pre-statutory use or a water right claim that fails to meet the statutory requirements found in Title 73 of the Utah Code.

**10. Irrigation Diversion Duty.** Because beneficial use is the basis, limit, and measure of a water right, an irrigation water right is limited by the acreage actually irrigated. The amount of water necessary to be diverted on an annual basis to irrigate crops to maturity in a specific area is referred to as the irrigation diversion duty. The irrigation diversion duty is based on estimated efficiencies associated with flood irrigation practices and accounts for the amount consumed by the crops, the amount supplied by precipitation, and the amount lost in conveyance and application. The diversion of more water than the recommended irrigation diversion duty is unnecessary, wasteful, and is not a beneficial use of the excess water.

The State Engineer has determined that the irrigation diversion duty in the Mill Creek Subdivision is 5.00 acre-feet per acre annually for the irrigation of land below the elevation of 5,200 feet and 4.00 acre-feet per acre annually for the irrigation of land above the elevation of 5,200 feet (elevations reference the North American Vertical Datum of 1988). A map reflecting the irrigation diversion duties in the Mill Creek Subdivision is shown on page ix.

The State Engineer recommends that the Court retain jurisdiction to change the portion of the irrigation diversion duty allowance for conveyance and application losses.

**11. Stockwatering Diversion Duty.** Water rights for watering stock are quantified in *Equivalent Livestock Units* (ELUs). An ELU represents the amount of water consumed by one large animal such as a horse or cow. The conversion of other animals to ELUs is based on the amount of water the animal consumes compared to a large animal. The diversion duty for stockwatering is 0.028 acre-foot per year (25 gallons a day) per ELU.

The point of diversion for a stockwatering right may be described in one of several ways. It may be identified at a specific point where the water is diverted from the natural water source. Alternatively, it may be described as a *point-to-point* diversion, which recognizes that stock may drink anywhere along a stream between two points. For point-to-point diversions, the Proposed Determination identifies the beginning and ending points with the beneficial use occurring between them.

**12. Domestic Diversion Duty.** Water rights for domestic or household use are quantified in *Equivalent Domestic Units* (EDUs). One EDU is the amount of water necessary to provide for the indoor use of one household. The State Engineer has determined that an EDU for typical maximum year-round use is 0.45 acre-foot per year (400 gallons per day), and an EDU for typical maximum seasonal use is 0.25 acre-foot per year. The diversion of more water than the recommended domestic diversion duty is unnecessary, wasteful, and is not a beneficial use of the excess water.

**13. Irrigation Periods.** Like the irrigation diversion duty, the period of use for irrigation varies depending on the reasonable irrigation season for a particular area. The State Engineer has determined that irrigation in this area is beneficial only from April 1 through October 31. In making this determination, the State Engineer relies on a report prepared by the Utah Agricultural Experiment Station and Utah State University entitled “Consumptive Use of Irrigated Crops in Utah.”

**14. Municipal Water Rights.** Water rights for municipal use are not quantified using a standard duty; instead, they contain individualized diversion and depletion limitations listed in the description of the water right’s attributes.

**15. Ownership of Rights.** The Proposed Determination includes the names of the owner of each water right as shown on the records of the State Engineer at the time of publishing. A claimant who has not updated ownership in the Division of Water Rights records is not identified as the owner of record in the Proposed Determination, even though they may have filed a signed Statement of Water User’s Claim. Such a claimant can update ownership with the Division of Water Rights by submitting a report of water right conveyance form to the State Engineer as provided in Utah Code § 73-1-10.

The State Engineer asks the Court to recognize in any future decree that ownership and title is determined by and according to the applicable deeds and conveyances, whether executed before or after the Proposed Determination was compiled, notwithstanding the owner identified in the Proposed Determination.

An appropriation of water may be the result of the joint action of two or more parties. Occasionally, the name of one party appears on the records of the State Engineer even though other parties may have an equitable interest in the water right. Because the Proposed Determination only includes the names of owners of record, the State Engineer does not attempt to identify equitable owners or to notify them of actions taken in a general adjudication. It is the responsibility of the owner of record to protect the interest of any equitable owner(s).

**16. Recommendation and Retention of Jurisdiction.** In accordance with her findings and determinations, the State Engineer respectfully recommends that the Court adopt this Proposed Determination of Water Rights; decree to the respective water users the water rights as set forth in the Proposed Determination, subject to any amendment that may be approved by Court order; and adjudicate as forfeited or invalid the water rights listed in the respective sections. The State Engineer recommends that the decree as entered by this Court shall supersede any prior decree of these water rights.

Use of the rights described in this Proposed Determination may change between the time the Proposed Determination was compiled and the time a final adjudication decree is entered – for example, as the result of an approved and perfected change application. The State Engineer thus recommends that the Court confirm each water right as of the date the Proposed Determination was published.

The State Engineer also recommends that the Court retain jurisdiction over the Mill Creek Subdivision from the period of time following the entry of an interlocutory decree until the entry of a final decree for the entire General Adjudication area, to adjust the quantification of rights for beneficial use to respond to better scientific information and analytical techniques and to modify the rights so that they conform to the final decree.

**17. Continued Assistance.** The State Engineer and the staff of the Division of Water Rights express their continuing willingness to assist the Court in this General Adjudication, as the Court requests.

**18. Date of Publication.** This Proposed Determination of Water Rights was approved for publication on the 19<sup>th</sup> day of May, 2021.

**57-7498****NAME:**United States of America, on behalf of USDA  
Forest Service**TYPE OF RIGHT:**

Federal Reserved Water Right

**PRIORITY DATE:**

May 26, 1904

**APPLICATION/CLAIM NUMBER:****QUANTITY OF WATER:** 2 acft**SOURCE:**

Mill Creek &amp; surface/underground tributaries

**BENEFICIAL USE:****Water Use Group No. 417004.**

**OTHER:** from Jan 01 to Dec 31 MISCELLANEOUS: Forest Service Uses.  
Acre Feet allowed by this Right for this Use: 2.0000 acre feet

*Consumptive current and future uses, including domestic uses at ranger and guard stations, firefighting, stockwater for Forest Service livestock, reforestation, erosion control, road construction and maintenance, and vehicle maintenance. In addition, the US may divert as much water as is necessary for emergency fire suppression within the Mill Creek Subdivision for forest lands.*

**OTHER COMMENTS:**

**SOURCE/POINT OF DIVERSION:** Any surface or groundwater source within the Forest Service boundaries in the Mill Creek Subdivision.

**BENEFICIAL USE:** The United States may exercise the Federal Reserved Water Right for consumptive future uses including domestic uses at ranger and guard stations, stockwater for Forest Service livestock, reforestation, erosion control, road construction and maintenance, and vehicle maintenance. 2.0 acre feet may be diverted and consumed annually. In addition, the United States may divert such additional amounts of water as are necessary for emergency fire suppression within the Mill Creek Subdivision to protect National Forest System lands, and such diversions shall not be charged against the 2.0 acre feet of annual diversion and depletion that the United States may make for administrative uses as described here.

**PLACE OF USE:** Within the Forest Service boundaries in the Mill Creek Subdivision.

**FUTURE INFORMATION REQUIREMENTS:** In the interest of comity and for the administrative convenience of the State Engineer, the United States shall file a notice with the State Engineer at least 60 days prior to developing surface or underground water within the boundaries of the Mill Creek Subdivision for Forest Service administrative uses other than emergency fire suppression. The State Engineer may elect to post this notice for the benefit of other water users. After receiving notification that the United States intends to develop

(57-7498 - continued)

groundwater, the State Engineer shall issue a `start card` or equivalent document for well drilling. Following the development of the use of water described, the United States will submit to the State Engineer a verified statement signed by the responsible federal official describing the source of water, the point or points of diversion, the nature, extent, and period of use, the quantity of water, the place of use, the diversion works and method of applying the water to beneficial use, and the means of water measurement.
