

Here are instructions on how to access you network drives from any computer over the internet.

1) Open an internet Browser and type into the URL "files.nr.utah.gov".

2) Enter your network "User name" and "Password" and select "Login".

This will bring up a page that has a file listing of your network drives. This web portal allows you to move files back and forth from you computer and the network drives by either downloading or uploading the file
