DEPARTMENT OF NATURAL RESOURCES

Division of Water Rights

MICHAEL R. STYLER KENT L. JONES
Executive Director *State Engineer/Division Director*

GROUNDWATER MANAGEMENT POLICY FOR WATER RIGHT AREAS 14 AND 69

The State Engineer believes there is unappropriated water available in the underground aquifer system of Water Right Area 14 (Pine Valley) and Water Right Area 69 (Wah Wah Valley and Sevier Lake Area). In the past applications in these areas were limited to small filings proposing to appropriate sufficient water for the requirements one family, 1/4 acre of irrigation and 10 head of livestock (1.73 acre-feet). The State Engineer will now consider applications for all uses and reasonable amounts. Applications will be considered based on their individual merits in accordance with Section 73-3-8 of the Utah Code.

Dated this 9th day of April, 2014,

Kent L. Jones, P.E., State Engineer
